Infor SyteLine

Stay productive.

What if you could deliver on time, every time? Every day, you race against time. Competition is fierce, so you need to get to market quicker and do a better job of matching up supply with demand. And no matter how complex your supply chain is, you need to respond faster to change, reduce excess inventory, and cut costs. Most importantly, you've got to give customers what you promised them, at the time you promised it. And here's the good news: Not only can you meet these expectations, you can beat them. The secret is to find an enterprise resource planning (ERP) system that improves productivity, both in the office and on the shop floor.

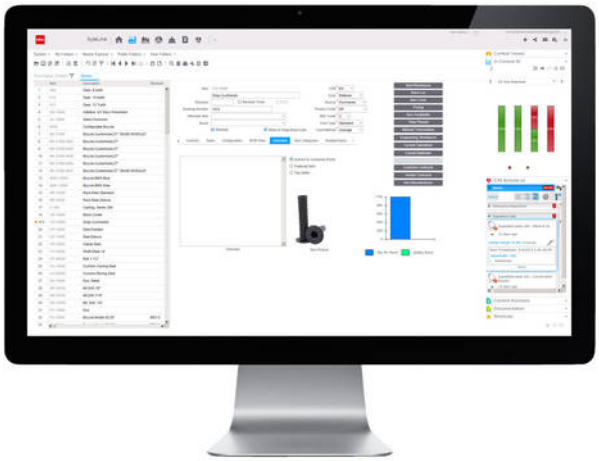
Get experience built in.

Developed by experts in discrete manufacturing, Infor™ SyteLine has more than 25 years of experience built in. That means you can be confident you've got the tools you need to get the job done—and that you're getting it all from an experienced support team.

You get a solution that works for you, and that lets you define your own business processes. So you can make the system your own instead of letting it dictate to you, and quit trying to drive a square peg into a round hole.

You'll find it much easier to deal with daily disruptions from employees, equipment, and suppliers because manufacturing best practices and process flows are embedded within Infor SyteLine.

You'll finally have an enterprise resource planning solution that lets you make your system your own, puts out daily fires, and gives you the tools and support you need to be successful.



Make better decisions, faster.

What if you could know the exact delivery date when an order is placed?

What if you could order what you need at the time you need it? And what if you knew in advance how an unplanned order would affect your other customer orders, capacity, material requirements, and cost of manufacturing?

With Infor SyteLine, you can do all that and more.

You no longer have to deal with unreliable, outdated processes for monitoring customer demand, scheduling delivery dates, and tracking resources. You'll be able to see everything you need to see at the time it happens, so you can make better decisions, faster.

You'll be able to:

- **Make it your own.** Fine-tune your ERP system on the fly and create a tool that solves your day-to-day business challenges, quickly and efficiently.
- **Get back to work.** When an unexpected order parachutes onto your production floor, adjust your current schedule so you can deliver all your orders on time, without interruption.
- **Be confident.** You'll know you've got the tools you need to get the job done. And you'll know you're getting them from an experienced team that has what it takes, knows what to do, and knows manufacturing.

With Infor SyteLine, you get:

Advanced planning and scheduling (APS). Find out if you have the materials, people, machines, and tools you need to manufacture an item. And continually monitor demand as it occurs. Before you commit to an unplanned order, see the ripple effect it will have on your schedule and your shop floor, so you can reset expectations with existing customers. If a machine goes down, you can update production schedules quickly. In the process, you'll boost productivity, improve order accuracy, increase on-time delivery—and keep your customers happy.

Complex product configuration. Make sure your production department can handle configured orders and that you can provide accurate configured orders to customers.

Materials and inventory management. Would you like to reduce your inventory while avoiding shortages? With Infor SyteLine, you can buy what you need, when you need it. You can also do away with side systems, which are difficult and costly to maintain. Plus you can shorten order entry time, eliminate duplicate orders, cut down on costly data entry errors, and make sure data is consistent—leaving you with more time to work on activities that grow your business.

Facts about Infor SyteLine:

- Role-based information
- Personalized user interface
- Flexible cloud deployment options
- Unlimited growth potential

Customer management. Manage all aspects of your relationships with customers and prospects, from estimating to invoicing.

Microsoft®-based system. With familiar tools and common navigation, you'll save time on implementation, customization, and training. Plus your IT staff will be able to focus on strategic projects rather than tactical issues. Not only that, you'll be able to draw from a huge talent pool that knows how to work with a Microsoft-based system.

Application event system. Customize your system without modifying your source code, and improve your workflow in the process. When you upgrade your system, you'll automatically upgrade your customizations at the same time.

Educational tools. Get your Infor SyteLine users up to speed quickly with Infor Enterprise Performance Accelerator Kit (EPAK) and Infor Knowledge Zone, an Internet-based learning solution. Not only will you speed up implementation, you'll reduce the burden on your IT staff.

Role-based information. Get all the information you need to do your job in a single screen. For example, if you're a production planner, you'll get data that helps you manage planned vs. actual production, unplanned scrap by reason, resource utilization, and on-time completion.

Better user experiences. Personalize your user interface (UI) to fit your particular industry, team, or an individual user. Add, remove, and edit fields, labels, and complete screens without having to call on IT for help. Get the information you need, when you need it, with easy-to-use grid forms. Plus, reduce or eliminate costly modifications to personalized features when you upgrade your system.

Easy integration of new companies. If you bought a new business today, could you have it up and running quickly? With Infor SyteLine, you can add a new company to your organizational structure, replicate your data, and be good to go—while you continue business as usual. Plus, when you sell off an old business, you can easily separate data. And you can go to one place for financial information, since your financial reporting solution is integrated within Business.

Infor cloud deployment options. Combine and multiply the performance-enhancing and cost-cutting benefits of Infor SyteLine by subscribing to it through the Infor cloud computing platform. Move seamlessly between on-premises Infor SyteLine and the cloud-based version, any time—or combine the two.

It's easy. All you need is an Internet connection and a subscription to cloud-based Infor SyteLine. Plus, you can expand Infor SyteLine to any location you want—without IT involvement—thanks to Infor's advanced cloud computing technology.

Get the power of Infor SyteLine along with:

Reliability and guaranteed performance—Attain the processing power and bandwidth you need to keep your business running.

No need to buy hardware—Concentrate on your business instead of technical details. When you run SyteLine as an Infor cloud computing solution, your account will be hosted on datacenters that are maintained and optimized by certified experts.

Security—Survive and keep operating in any worst-case scenario with the help of full redundancy and world-class disaster recovery systems. Plus, get the latest and most powerful defenses against intrusion, hacking, and unauthorized access.

Unlimited, instantaneous growth potential—Get your business software solution to your expanded facilities and new locations ahead of you—with as many seats and sites as you need—anytime, anywhere.

Be confident you've got the tools you need to get the job done—and that you're getting it all from an experienced support team. Personalize your enterprise resource planning system, focus on your work, and be confident you've got the right software and support team for the job...all with Infor SyteLine.

Get quick results.

Complexity and competition continue to increase in discrete manufacturing. Personalize your enterprise resource planning system, focus on your work, and be confident you've got the right software and support team for the job...all with Infor SyteLine.

Because built-in processes go to work for you immediately, you'll:

- Go to market faster.
- Deliver products on time.
- Do more with less.
- Reduce the impact of change.
