Warehouse Management for Fast-moving Industries

See fast results from Infor SCM Warehouse Management for consumer products, food and beverage, specialty chemicals, and other fast-moving industries.

Do business better.

No matter how great your products, success won't happen unless your warehouses operate at peak performance every minute of every day. Logistics managers in fast-moving industries, such as consumer products, food and beverage, and specialty chemicals, are responsible for ensuring not only that the right products get to the right place at the right time, but also that those products are fresh, safe, and compliant with regulations. The key to success is an advanced warehouse management solution that provides complete visibility and management of all activities in and around the warehouse—including labor, equipment, space, and transport.

Leverage experience.

At Infor™, our professionals—many of whom have more than 25 years of experience—are helping companies like yours solve their toughest logistics challenges. This experience is built in to Infor SCM Warehouse Management, a comprehensive solution for keeping your warehouses operating efficiently and compliantly, so you can satisfy your customers' unique requirements while guaranteeing quality and improving operating margins. Our solutions help you achieve total control over your warehousing operations: improving the visibility and accuracy of your inventory, improving labor productivity, ensuring compliance with customer or legislative requirements, delivering on your service level commitments, and protecting the integrity of your brand.

INFOR™

Get business specific.

Infor SCM Warehouse Management represents the new generation of warehouse management applications that helps manufacturers and their supply chain partners integrate operations and become more efficient and responsive to customer demands. It helps you maximize product placement strategies, prioritize tasks, implement fair productivity standards, and increase logistics efficiency. Features include:

- **Detailed inventory tracking and lot traceability.** Multiple units of measure, lot control, and catch weights improve inventory accuracy and visibility to offset margin squeeze. Deep functionality for work order/location grouping into batches optimizes productivity, and provides a complete paper trail in case of a product recall.
- **Shelf life allocation.** The solution addresses shelf life, maturation times, storage restrictions, and overlapping processes as it helps you determine optimum storage location for raw materials and finished products.
- **Labor management.** Maximize labor efficiency through forecasting, time and attendance, assignment scheduling and monitoring, and enforcement standards.
- **Slotting.** Minimize disruptions from demand variability by easily adjusting product placement according to seasonality, special promotions, and changes in customer order patterns.
- **Radio frequency (RF) and voice direction**. Use hands-free connections and advanced speech recognition technology to voice-enable order selection, replenishments, put-aways, transfers, and receiving.
- **Integrated warehousing and transport.** Enhance customer service by integrating your warehouse and transportation activities.
- **Regulatory and customer compliance.** Gain clear visibility and audit tracking that allow you to track product all the way through your distribution supply chain to its final customer destination. You can also easily comply with the requirements of retail customers and others.
- **Modern web-based technology.** Intuitive web-based user interfaces speed training time. Sharp exceptions and alerts keep you on top of the essential activities in a busy environment. Our open architecture lets you easily connect to other systems across the organization.

See results now.

Infor SCM Warehouse Management has expertise built in that reduces the need for customization, speeds implementation time, and delivers ROI that you don't have to wait for. You'll begin to see immediate benefits from the very first day:
