Understand trends, patterns, and exceptions affecting your business, and provide answers to critical business questions on demand, with Infor PM Query & Analysis.

INFOR PM QUERY & ANALYSIS FOR FMS INFINIUM AND HCM INFINIUM

DETERMINE THE RIGHT DIRECTION.

When it comes to business, you need to know which direction to take. Whether you're acquiring a new company, launching a new product, or finding a new way to beat the competition, you need to know where you're headed and why. To do that, you need to provide managers at all levels of your organization with the information they need to make strategic decisions. And for that to happen, you need a performance management (PM) solution that integrates with your financial management system (FMS) and human capital management (HCM) solution.

WE'LL POINT THE WAY.

With so much at stake, you need to find the right information technology partner to back your efforts. Get proven, business-specific solutions by partnering with Infor™, which has more than 25 years of experience helping companies like yours solve their toughest challenges.

Deliver the right information to the right people at the right time with Infor PM Query & Analysis, a dynamic, multi-language, multi-currency set of business intelligence tools that is powerful, flexible, secure, and easy to use.

GET DOWN TO BUSINESS—QUICKLY.

You can get up to speed without much training or technical skill, because Query & Analysis is integrated with Infor FMS Infinium, Infor HCM Infinium, and Microsoft® Office. Using familiar desktop applications, you can quickly and efficiently create reports that highlight trends, patterns, and exceptions—giving managers the information they need to easily analyze business data and accurately measure performance. And since you won't require much IT support and involvement, maintenance will be easy, too.

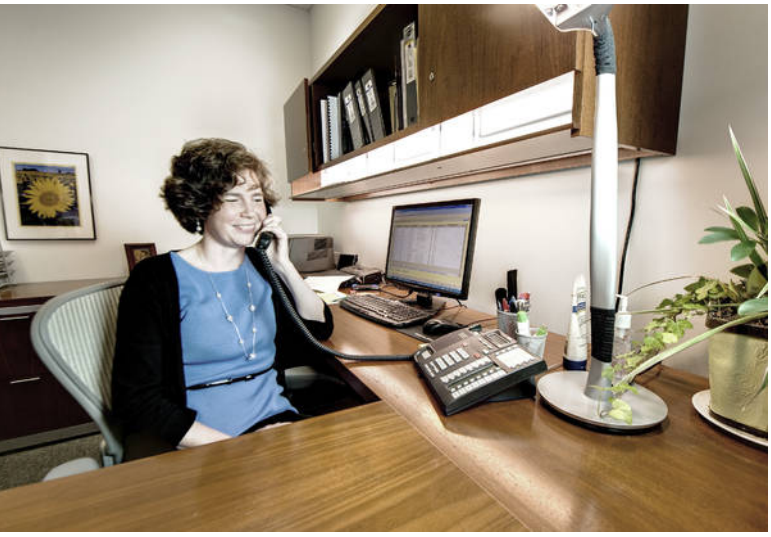
Not only that, you can drill down to supporting live transaction information, and view data in ways that include multidimensional cubes and charts.

You'll get:

Query & Analysis XL and Word

Work in a familiar Microsoft Office environment with these add-in components for Excel® and Word®:

Query & Analysis XL. Analyze business data faster, easier, and more flexibly. You don't have to understand sophisticated database structures to create reports, since you get the information you need in an intuitive user interface with common names for database structures. You can design reports, publish them to the web, analyze cubes, and automate XL functions, while ensuring all data is secure.



Infor PM Query & Analysis:

> Integrates with Infor FMS and HCM Infinium

> Operates in a familiar Microsoft Office environment

> Gives you multiple views of data

> Is easy to use and maintain

> Provides you with secure and governed access

Query & Analysis Client for Microsoft Word. Quickly extract data for form-based reporting and analysis, and then easily integrate it into monthly reports, management reports, statutory reports, and other documents. Plus, combine information from multiple databases with narrative content. Integrate with Word's Mail Merge feature, analyze cubes, and define your own output while keeping your data secure.

Query & Analysis Executive

Analyze trends, problems, and opportunities that are often concealed within corporate transactional data, and get a top-down view of your entire business. You can drill down into, expand, and break out data, as well as analyze cubes. Plus, you can save and replay frequently used analysis procedures. You can also combine data from multiple applications into a single, concise report, and publish reports to the web.

Query & Analysis Alert

Automatically manage, run, and distribute reports based on scheduled events. Identify, analyze, and report on performance and trends that are concealed within your database, and deliver better information by automating aspects of the reporting process. You can create, edit, and schedule tasks for processing on a time or event basis. Plus, you'll be able to communicate directly with other Query & Analysis components, such as XL and netEnterprise.

Query & Analysis netEnterprise

Share documents and publish them on the web, collaborating on business content across your enterprise. Publish multiple file types, including XL and Executive reports, and then deliver them to business users via a web browser. You can also automate the report publishing process using Query & Analysis Alert. Plus, you can ensure that only authorized users are able to access sensitive data.

Query & Analysis EIF Studio

Connect to other financial systems with this integrated development environment. You can create and modify metadata layers and present them in business terms, making it easier for business users at all levels to access data on their own.

THE BOTTOM LINE.

Get the analytics, business intelligence, reporting, and alerts you need with Infor PM Query & Analysis for FMS Infinium and HCM Infinium, which provides you with familiar desktop tools and a fast return on your investment.

Develop reports quickly and easily, without having to understand sophisticated database structures. Plus, get help creating your own reports with sample reports that are included within the solution, such as the HR Basic Employee report, Vendor Invoice report, and Asset Register report. And rest assured your end users will get access only to data they're approved to view, because Query & Analysis integrates with Infinium security.

You can get up to speed without much training or technical skill, because Query & Analysis is integrated with Infor FMS Infinium, Infor HCM Infinium, and Microsoft Office.

You'll be able to:

- Get users up and running very quickly with minimal IT involvement.
- Better understand trends, patterns, and exceptions affecting your business.
- Provide answers to critical business questions on demand.

THERE IS A BETTER WAY.

At Infor, we work with a core belief. We believe in the customer. We believe that the customer is seeking a better, more collaborative relationship with its business software provider. And a new breed of business software: created for evolution, not revolution. Software that's simple to buy, easy to deploy, and convenient to manage. Our 70,000 customers in more than 100 countries stand with us. We look forward to your sharing in the results of our belief. There is a better way. For additional information, visit www.infor.com.
