

Reach new levels of Lean manufacturing and achieve inventory accuracy in the high 90s with Infor Barcode for IE&M.

## INFOR BARCODE FOR INDUSTRIAL EQUIPMENT & MACHINERY COMPANIES

### DO BUSINESS BETTER

You know that in the industrial equipment and machinery (IE&M) manufacturing industry today, market dynamics can change in a heartbeat. You need to be flexible enough to respond just as quickly. Meeting customer demands and delivering well-engineered products in shortened lead times is critical, all while squeezing costs out of an increasingly complex global supply chain. That means automating more and more processes to reduce labor and inventory costs. You can meet these requirements with Infor™ Barcode, a powerful data collection solution with special functionality for manufacturing companies like yours.

### LEVERAGE EXPERIENCE

With Infor, you get IE&M professionals—many with more than 25 years of experience—that can help you solve your toughest business challenges. Their experience is built in to Infor Barcode, a tool that extends ERP systems to help you achieve operational excellence across your enterprise. Leading IE&M manufacturers, like you, are using the solution to decrease the time and manual effort to enter information into their ERP systems—critical information that helps them optimize inventory processes and meet tight assembly schedules, while reducing labor costs.

## GET BUSINESS SPECIFIC.

Since Infor Barcode optimizes processes across the supply chain, you achieve precision every step of the way. Best of all, you are better able to satisfy unique customer requirements—the foundation for becoming a leader in the IE&M industry.

While your ERP system handles effective and accurate quoting, estimates, contracts, and service level agreements to improve your profitability, Infor Barcode adds a new dimension of value by collecting the right data when and where you need it. It is a new, value-add layer to your ERP system—a mission-critical tool to maximize visibility across your supply chain and to ensure accuracy and timeliness.

Infor Barcode helps your organization be the flexible, customer-centric enterprise you want it to be. Support for job booking, cross-docking, serialization, consignment inventory, Kanban, hours accounting, service, and real-time storage condition monitoring give you utmost efficiency and accuracy in the processes you need to be competitive today.

Across your processes, you can:

- ▶ Compress processes to simplify and shorten tasks.
- ▶ Add to the bottom line with real-world operational excellence.
- ▶ Reduce lead times and data entry errors.
- ▶ Automate material flow through your enterprise.
- ▶ Get accurate, up-to-date information so you can improve customer service.
- ▶ Easily track total traceability and lot control.
- ▶ Manage mixed mode manufacturing—maintain push (order-based) and pull (orderless) environments.
- ▶ Use partial picks, location substitution, and out-of-stock conditions.
- ▶ See the benefits of built-in integration with third-party freight systems, such as UPS WorldShip™.
- ▶ Take advantage of standard functionality in receiving, inventory, production and sales, plus enhanced distribution and warehouse management.
- ▶ Increase quality with ongoing regulatory compliance.

## SEE RESULTS NOW.

Shouldn't you be among the hundreds of companies worldwide that are using Infor Barcode to achieve greater efficiencies in the warehouse, on the shop floor, in time and attendance reporting?

You can reach new levels in Lean manufacturing, simplify your supply chain, and build your bottom line. All with Infor Barcode. Let us show you how.
