

Create the solid, structured processes, flexibility, and agility you need to meet your customers' complex requirements and government regulations. All with Infor Barcode.

## INFOR BARCODE FOR LIFE SCIENCES COMPANIES

### DO BUSINESS BETTER

Precision accuracy is your Job #1 in the life sciences industry. It's how you become a leader in the field, but mounting pressures in the marketplace make it tougher to achieve. Government price controls, cost pressures, and fewer blockbuster drugs threaten your bottom line, while emerging compliance mandates and potential mergers and acquisitions create a shifting landscape that challenges your ability to maintain consistent quality. You need to increase efficiency, cut costs, and maintain the utmost accuracy in your manufacturing processes—no matter what changes you face. And you can with Infor™ Barcode, a powerful data collection solution from an ERP leader.

### LEVERAGE EXPERIENCE

With Infor, you get life sciences professionals—many with more than 25 years of experience—that can help you solve your toughest business challenges. Their experience is built in to Infor Barcode, a tool that extends ERP systems to help you achieve operational excellence across your enterprise.

Leading life sciences manufacturers, like you, are using the solution to automate processes, improve inventory accuracy, reduce data entry, and simplify compliance with government regulations and other mandates.

## GET BUSINESS SPECIFIC.

Since Infor Barcode optimizes processes across the supply chain, you achieve precision every step of the way. Use it to eliminate errors and improve efficiency in your most critical procedures.

Infor Barcode adds a new dimension of value to your ERP system by collecting the right data when and where you need it. It is a new, value-add layer to your ERP system—a mission-critical tool to maximize visibility across your supply chain and to ensure accuracy and timeliness. You also get complete audit trails for compliance with today's stringent regulations.

Infor Barcode automates your internal business processes, eliminates waste, and reduces costs in the supply chain, so you gain the flexibility and control mechanisms you need to easily achieve your goals. You get the utmost efficiency and accuracy in the processes you need to be competitive, thanks to the solution's support for lot control, traceability and serialization, FDA-regulated processes, FIFO inventory methods, shipping verification transactions with complete audit trails, shelf life management, and real-time storage condition monitoring.

Across your processes, you can:

- ▶ Track total traceability and lot control more easily.
- ▶ Increase quality with ongoing regulatory compliance.
- ▶ Compress processes to simplify and shorten tasks.
- ▶ Add to your bottom line with real-world operational excellence.
- ▶ Manage complex process manufacturing.
- ▶ Reduce data entry errors, while improving inventory accuracy.

From warehouse to shop floor, Infor Barcode simplifies your material and manpower processes, complements and extends your existing ERP applications, and empowers users with mobile wireless and static data capture solutions. It accelerates your most important transactions and ultimately eliminates the root causes of data inaccuracy.

## SEE RESULTS NOW.

Shouldn't you be among the hundreds of companies worldwide that are using Infor Barcode to achieve greater efficiencies in the warehouse, on the shop floor, in time and attendance reporting?

You can achieve new levels in Lean manufacturing, simplify your supply chain, and build your bottom line. Create the solid, structured processes, flexibility, and agility you need to meet your customers' complex requirements and government regulations. All with Infor Barcode.
