

Infor CloudSuite Automotive

Solution summary

The following components are included with the core Infor CloudSuite™ Automotive offering:

Infor® LN—A single, global platform for growth and innovation, Infor LN empowers you to run your entire business—across every department, every site, and every country—on one platform. Delivering flexibility in operations and strength in financials, Infor LN is a uniquely versatile system that delivers everything automotive companies need in a standard, packaged ERP solution. The result is an integrated system that gives you complete visibility and control across your organization and supply chain, with the flexibility to make adjustments as your business evolves. Infor LN has built-in capabilities to support audits by maintaining all of the quality and compliance records required by your OEM customers.

Infor Supplier Exchange—Infor Supplier Exchange supports online collaboration between automotive suppliers up and down the value chain, including logistics service providers, outside processors, purchase parts suppliers, and discrete purchase order suppliers. This solution is especially valuable to Tier .5 and Tier 1 automotive suppliers that need better visibility into their entire ecosystem through seamless online collaboration.

Infor Automotive Exchange—Infor Automotive Exchange extends and complements traditional ERP order-to-cash capabilities by normalizing customer demand data across all customers. This solution supports standard automotive business practices and trading partner variations of standard business practices, and seamlessly integrates into a supplier's existing enterprise system landscape.

Infor Warehouse Mobility—An online extension of Infor LN's inventory management capabilities, Warehouse Mobility eliminates errors and automates material movement via a standardized barcoding solution. This intuitive, real-time application supports various handheld scanners, tablets, and smart phones and simplifies processes like purchase-order receipts, putaway, material issues, packing, and shipping.

Infor ION®—Infor's Intelligent Open Network provides a powerful and scalable framework that helps you eliminate operational silos, dramatically improve exception management, and achieve end-to-end efficiency. You get the complete infrastructure needed for integrating both Infor and third-party applications, along with a publish-and-subscribe methodology that uses XML technology for open communication. Infor ION also provides the tools necessary to create alerts and workflows that allow users to manage on an exception-only basis.
