

About Infor

Infor® is fundamentally changing the way information is published and consumed in the enterprise, helping 70,000 customers in 200 plus countries improve operations, drive growth, and quickly adapt to changes in business demands.

Infor combines focused, hands-on industry experience with global breadth to help companies deal with today's challenges and prepare for tomorrow's opportunities.

We offer deep industry-specific applications and suites that are engineered for speed and use groundbreaking technology to deliver a rich user experience. Our applications also feature flexible deployment options that allow customers to run their businesses in the cloud, on-premises, or both.

Infor Mongoose—application development

Infor-redefining business software

Infor products mark the debut of an entirely new category of business software, conceived from today's flexible open standards and delivered through an agile, unbreakable architecture that gives customers the speed, freedom, and power they've always wanted—but couldn't get until now.

With the Infor suite, we're reimagining business software to change the way work is done in the industries we serve. We're building industry suites that deliver maximum value quickly, with features tailored to the specific needs of each industry. By creating revolutionary lightweight middleware technology, and new ways to implement and integrate business software, Infor helps companies leap over traditional application boundaries to improve performance and streamline workflow.
