

Infor10 ERP iEnterprise (LX) for Manufacturing

Do business better.

Getting products to market faster is a race that accelerates every day. With markets growing globally and customer requirements constantly shifting, keeping pace is a challenge, especially when your other essential business drivers include keeping your costs low and quality levels high. You also must manage the item variability and version control that makes manufacturing unique. The key is having an ERP system with advanced planning and manufacturing functionality built specifically for the challenges process, discrete, and mixed-mode manufacturers face.

Leverage experience.

At Infor™, our manufacturing professionals—many with more than 25 years of experience—are helping companies like yours solve their toughest challenges. That experience is built in to Infor10 ERP iEnterprise (LX), a comprehensive solution designed for manufacturing excellence from forecast to shop floor, from container to customer. You'll have the tools you need to:

- Improve efficiency and productivity.
- Reduce costs and speed time to market.
- Meet customer expectations every time.

Get business specific.

You get powerful forecasting tools that let you plan production levels effectively, while shop floor applications give you the flexibility to truly manufacture by exception without increasing your costs.

And because you get support for multiple manufacturing modes, you'll be able to more efficiently schedule people and capacity to meet your lean manufacturing goals. Features include:

Eliminate waste and improve productivity by minimizing the number of manual interventions in manufacturing to customer demand with Infor10 ERP iEnterprise (LX).

Advanced Process Industries (API) provides full forward and backward lot tracing, potency setup, standard batch manipulation of ingredients, batch balancing, co-product and by-product production, costing, and campaign-planning functionality.

Capacity Planning (CAP) provides vital feedback on the viability of production plans to production planning and executive management.

Configuration Management (CMS) supports products that have a complex set of optional components or dimensional variability, which are specified by the customer at order entry time.

Just-In-Time (JIT), Repetitive, and Flow Manufacturing supports repetitive demand/production management. It lets you create production schedules based on run rates by shift.

Master Production Scheduling (MPS) makes full use of multilevel planning bills of material to support demand from group forecasting, customer order entry, and DRP supply chain.

Material Requirements Planning (MRP) allows the production planner to modify production schedules to meet customer and internal stocking demands using on-line material planning.

Quality Management System (QMS) and Laboratory Management System (LMS) functionality supports quality assurance and production control functions by ensuring maximum conformance to specification.

Shop Floor Control (SFC) provides a powerful material/capacity inquiry for ad hoc "what if" analysis before releasing a shop order.

Inventory Management (INV) allows management to better plan and control all types of inventory, such as finished goods, raw materials, purchased stock, and work-in-process. It also manages dual inventory measures with dynamic weights and measures.

See results now.

You get ROI you don't have to wait for because Infor10 ERP iEnterprise (LX) has mixed-mode manufacturing-specific functionality built in that reduces the need for customization and speeds implementation time. From the very first day, you'll be a leaner organization, with smarter planning and more efficient manufacturing operations. In the race to reach your customers before the competition does, Infor is the ideal partner and ERP iEnterprise (LX) is the ideal solution.

About Infor.

Infor is a leading provider of business software and services, helping more than 70,000 customers in 164 countries improve operations and drive growth. To learn more about Infor, please visit www.infor.com.
