

Infor Implementation Accelerator Solutions

A solid business solution for your industry

Infor™ Implementation Accelerator Solutions make it possible for organizations like yours to implement a fully-integrated Infor solution quickly and without major modifications, while still benefiting from the solution's flexibility and ready ability for long-term, continuous improvement. With Infor Implementation Accelerator Solutions, you get the same scalability and integration ease that Infor applications are known for, allowing you to set your own pace to expand your use of the enterprise software. You can achieve all of this using Infor Implementation Accelerator Solutions' pre-built, optimal industry processes that are based on Infor's extensive implementation library, which provides you with the immediate opportunity for business improvement and a faster return on your Infor investment—at a lower risk.

The Infor Implementation Accelerator Solution approach

Rather than undergo a time-consuming, traditional implementation—or reinvent the wheel to create content from scratch for your organization—you'll have access to best-practice content (pre-defined menus, processes, and structures) specific to your industry. By combining predefined structure and content, Infor Implementation Accelerator Solutions deliver proven and time-tested outputs.

Based upon your project timeline and resource availability, you'll have the flexibility to deploy the solution and use it right away, or continue to refine the solution to meet your unique current or future needs.

A shortcut to benefit

- **Get your business up and running fast with a predefined, flexible solution.** With Infor Implementation Accelerator Solutions, you can speed up implementation by pre-configuring as much as 90% of core processes within the Infor applications, while still giving you the flexibility to customize it to your unique requirements.
- **Reduce implementation risk and stress for your employees.** We refine your pre-configured solution proposal step by step, so fewer personnel need to be involved in project scope development and solution implementation. This allows you to focus on getting users proficient on the Infor applications.
- **Build a foundation for future success.** Infor Implementation Accelerator Solutions are ideal for companies that want to implement Infor applications rapidly and easily, while envisioning future growth and maintaining long-term scalability and the ability for continuous improvement.
- **Lower overall total cost of ownership.** Your Infor solution can be less costly, less risky, and deliver faster time to benefit.

Infor ensures the benefits keep coming

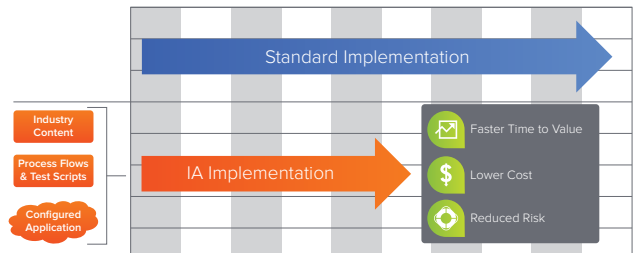

As your business continues to change and grow over time, you can expand the scale and scope of your Infor solution and integrate it with other applications.

You can:

- Grow from one to many sites locally or around the world.
- Increase the complexity and/or change the scope of your product line.
- Add functionality, such as advanced planning, production, sales and marketing, human resources, and analytics.
- Enter new markets with the confidence of knowing you've got the integrated application support you need to compete successfully anywhere, against companies of any size.

IA Approach

Reducing the effort and risk

With Infor Implementation Accelerator Solutions, there's virtually no end to where you can take your Infor solutions. Achieve and maintain your competitive edge, while competing with some of the biggest and best companies in your industry, with Infor Implementation Accelerator Solutions.
