

iProcure

➔ Offered as a web-hosted, subscription-based service, Infor EAM iProcure is streamlining the indirect purchasing processes at companies worldwide.

Do business better.

With most businesses allocating between 3 and 5% of revenue for the purchase of indirect materials, it's no wonder forward-thinking businesses are striving to make the process more efficient and the materials less costly. Even high volume, low dollar materials like nuts, bolts, light bulbs, safety equipment, and office supplies warrant the same level of strategic focus that traditionally is applied to investments in raw materials and capital equipment. The question, of course, is how to transform what is often a series of individual, ad hoc processes into a company-wide strategic approach to indirect purchases.

To make their maintenance, repair and operations (MRO) purchasing more strategic, many companies are turning to Infor™ EAM iProcure.

Leverage experience.

Infor EAM iProcure is an online marketplace based on a procurement application that enables a fast, easy, and strategic approach to purchasing MRO supplies. Offered as a web-hosted, subscription-based service, Infor EAM iProcure is streamlining the indirect purchasing processes at companies worldwide. Since being launched in 1989, the Infor EAM iProcure marketplace has helped customers save money on millions of transactions. Created and managed on a day-to-day basis by a team of online procurement experts with a combined 50 years experience, the solution can help you consolidate vendors and aggregate indirect spend with individual suppliers to better control costs.

INFOR™

Get business specific.

Infor EAM iProcure features a fast, user-friendly search engine that provides one-click access to images and item details from a wide range of supplier catalogs containing more than 10 million industrial parts and services. The solution can be accessed from a browser anywhere, anytime. Its intuitive, user friendly interface makes iProcure easy to learn. Other key features include:

Supplier services and catalog maintenance. The iProcure Supplier Services Team ensures that supplier integrations and catalog content updates run smoothly and efficiently. The catalog loading process allows customers to review price updates before they are made available for purchase. With iProcure, customers can select from the nation's leading suppliers or choose to add their preferred suppliers.

Capture, measure and manage spend. Infor EAM iProcure gives subscribing companies the ability to capture all purchasing transactional data at the SKU-level. With easy access to this data, companies can measure purchasing activities for compliance and savings, as well as adopt a more strategic approach to sourcing.

Approval workflow. iProcure routes requisitions for approval through email notifications to supervisors in a systematic approach that adheres to established approval levels. The system can handle an unlimited number of approvals prior to the order submission.

Dedicated account management. With each iProcure engagement, an experienced account team leverages best practices to ensure that the initial implementation is successfully completed and ongoing transaction processing operates smoothly.

Easy integration with Infor EAM solutions. Infor EAM iProcure completes the MRO supply chain by linking enterprise asset management solutions to suppliers. iProcure enables users to eliminate unnecessary paperwork by reducing order fulfillment times and eliminating duplicate inventory/purchasing databases.

See results now.

Companies worldwide are using Infor EAM iProcure to transform their inefficient supply purchasing practices into a streamlined, strategic approach that delivers significant savings after only a few months operation. Key benefits include:

- Reduced off-contract, "maverick" spending
- Reduced prices on indirect purchases
- Reduced requisition-to-order costs
- Faster requisition-to-order cycle times
- Supplier base consolidation
- Faster order fill times
- Reduced order error rates
- Lower IT infrastructure expenses
- Improved supplier contract compliance

About Infor.

Infor acquires and develops functionally rich software backed by thousands of domain experts and then makes it better through continuous innovation, faster implementation options, global enablement, and flexible buying options. In a few short years, Infor has become the third largest provider of business software. For additional information, visit www.infor.com.
