

Infor SCM Labor Management has expertise built in to speed implementation time and deliver quicker ROI.

INFOR SCM LABOR MANAGEMENT

DO BUSINESS BETTER.

Just how productive were you today? In the current market, successful companies understand that when it comes to labor management, peak performance is a target that changes hourly. How do you measure it? Who are your top performers? Is productivity improving, and do the standards against which you measure it have to improve, as well? If you are a company in which warehouse labor is a significant percentage of distribution costs, the key to success is a solution that provides the utmost visibility to the performance of your people, and comprehensive tools for improving it.

LEVERAGE EXPERIENCE.

At Infor™, our professionals—many with more than 25 years of experience—are helping enterprising companies like yours solve their toughest business challenges. Their experience is built in to Infor SCM Labor Management, a comprehensive solution that delivers dramatic gains in productivity. The Infor SCM solution provides visibility into the true story of the productivity of your warehouse workers. Infor SCM Warehouse Management drives labor productivity and visibility, while the Labor Management module takes you a step further, establishing a foundation for further efficiencies with labor planning and labor standards configuration tools.

GET BUSINESS SPECIFIC.

Infor SCM Warehouse Management and the integrated Labor Management module work together to help you reach new levels of visibility and productivity, giving you a complete package that reduces costs and improves efficiency and productivity in your warehouses. Warehouse Management lets you direct, track, measure, and report employee productivity, while Labor Management provides discrete standards and labor planning tools.

Infor SCM Labor Management provides:

- ▶ **Labor planning and reporting** Match the correct head count to the planned work for today, tomorrow, or next week. Planning and forecasting tools help you assess your volume of work, estimate labor by shift, task, and work zone, and create a labor plan accordingly. Enterprise reports compare metrics across multiple facilities, including productivity, performance, effectiveness, and labor costs, while facility reports focus on metrics within a single facility.
- ▶ **Benchmarks for labor standards** With Infor LM, you have a flexible tool for creating standards that support detailed or summarized steps, ensuring you measure the performance of your people against optimum benchmarks, taking all constraints and restrictions into account. Reusable standard elements across tasks make the standard-setting process easy, along with conditional variability, operational allowances, and travel path constraints and variability.
- ▶ **Task management** Based on your configured rules and priorities, our solution automatically directs workers to start a new task once they finish an old one. With users signing on and starting assignments via RF, you can discover your top performers, track performance at an individual, group, or task level, find and eliminate unproductive tasks, and bring everyone's work up to optimum standards.
- ▶ **Labor management** High service levels demand optimum labor efficiency. Forecasting, time and attendance tracking, assignment scheduling and monitoring, and enforcement of standards optimize labor and reduce costs.

SEE RESULTS NOW.

Infor SCM Labor Management has expertise built in that speeds implementation time and delivers a quick ROI. You'll begin to see immediate benefits from the very first day, including dramatic increases in labor productivity, often by as much as 15-40%. By efficiently matching warehouse resources to labor estimates, you balance your workforce across all activities, elevating labor management from guesswork to science and fine-tuning your performance to achieve new levels of competitiveness.

If you want to do business better tomorrow, contact us today. We'll get you started.
