Customize your experience

If you’re like most of us, you’re flooded with information—and ways to access that information. It’s all out there, somewhere, but is it easy to find when you need it? Is it intuitive to use?

When it comes to navigating your ERP system, we believe simpler is better. You deserve a user experience that’s both functional and fun to use. With Infor® Smart Office & Ming.le™, you get a user interface that you can personalize to become your “information workplace.”

Bring together your enterprise applications, business intelligence, and desktop tools—all in the context of the business task at hand with Infor Smart Office & Ming.le. You’ll have all the content, tools, and context you need to work more effectively and efficiently.

Get software you want to use

You now also have the option to choose to deploy a native or web UI with both Infor Smart Office & Ming.le, available within the same license. If you choose to deploy Smart Office, you have the ability to configure Ming.le widgets that allow users access to collaboration in alerts, tasks, posts, and notifications. The same license will also allow you to deploy the rich web UI for the Ming.le product. We believe in offering the maximum potential and flexibility to match whatever needs you might have for your UI. (Ming.le requires ISO version 10.2+)

Imagine a user interface that’s as intuitive to use as iTunes®, Mac OS X, Windows®, and Google®. With Infor Smart Office & Ming.le, you’ll gain access to the technology you’re used to, but with a much richer, more effective and personalized user experience. You’ll be able to control all the shortcuts to applications, newsfeeds, workflow activities, and tools you use every day from one central location.

Rather than waste time logging in and out of multiple applications, with Infor Smart Office & Ming.le, you can access all the Infor and non-Infor applications you use within a single interface. At the press of a button, you get the information you need, where you want it, in a way that’s meaningful to you.

With Infor Smart Office & Ming.le in place, you’ll find yourself working more seamlessly among the applications and tools you know and trust. Yet your experience is richer—more personal—with widgets that make it simple to launch applications, collaborate, and organize your work experience.

Bring out the power in your software investment

Bring out the power—and value—of your business software investment with Infor Smart Office & Ming.le. Because Infor Smart Office & Ming.le is pervasive across your business software, you’ll be able to find and share information, discover and react to problems, use applications, and make information accessible to more people in your organization.
Your people will want to use Infor Smart Office & Ming.le because it’s simple to learn and use. And, as a result, they’ll be more productive. For example, you can work with personalized lists of frequently used information, such as vendors or departments. You can use these intuitive lists to find and update information much more quickly than through traditional application screens. Plus, with Infor Smart Office & Ming.le, you can use Microsoft® Excel as the user interface for your Infor Lawson software, helping to make it easier and faster to do repetitive tasks and to apply the power of Microsoft Office more dynamically with your Infor Lawson applications.

And while you gain a truly personalized user experience, you don’t sacrifice security. Your data integrity and security policies are still rigorously enforced.

Connect it all

When you choose Infor, you get the user experience of a consumer product married to the functionality of enterprise software. We’ve created Infor Smart Office & Ming.le with hands-on customer feedback and testing across the industries and markets we serve.

Where function meets fun, you’ll find Infor Smart Office & Ming.le—your personalized solution that connects people, processes, and information to enhance user productivity across your enterprise.

“Infor Smart Office & Ming.le provides a flexible user interface that allows users to work as they function best. The ability to personalize, customize, and work with the system in multiple ways puts the power in the hands of each user. Productivity is the key...and Infor Smart Office & Ming.le is a timesaver.”

—Mark Cook, Infor Lawson Team Lead, Moffitt Cancer Center

About Infor
