

"Infor EAM will help us improve our productivity, and in turn reduce costly downtime."

—LUCAS PROLA, MAINTENANCE LEADER, RIETER ARGENTINA.

MAXIMIZING SYSTEM I WITH INFOR EAM

ADD ADVANCED ASSET MANAGEMENT FOR TOP-PERFORMANCE.

Nobody likes being surprised by unplanned costs, especially in a time of economic turbulence. But underperforming assets can surprise you with costs that jeopardize the health of your whole company. Asset downtime disrupts production and leads to lower customer satisfaction. Inadequate preventive maintenance can increase the cost of keeping assets.

Your familiar, reliable IBM System i® platform can help you keep your assets performing at peak levels. By leveraging your existing investment in System i with Infor™ EAM, you'll improve the performance of all the other assets in your business. Few software providers can match Infor's investment of time and effort in solutions for the System i platform that ensure your long-term success.

LEVERAGE EXPERIENCE.

More than 10,000 organizations worldwide—both public and private—are using Infor EAM to better manage, maintain, and track their assets, as well as drive better decision-making in maintenance, inventory and warranty, uptime, risk management, and strategic planning. Composed of three major components—asset management, material management, and procurement—Infor EAM has industry-specific functionality designed to help manufacturing, facilities management, life sciences, fleet transportation, and public sector organizations solve their critical asset performance challenges.

DO BUSINESS BETTER.

By leveraging Infor's experience, your company can:

Maximize maintenance effectiveness—Infor EAM streamlines the maintenance process so customers extend the longevity of their assets and improve productivity. Capabilities include electronic creation and assignment of work orders, condition monitoring, and analytics to determine optimum preventive maintenance schedules.

Reduce inventory costs—Infor EAM helps customers avoid carrying unneeded inventory or experiencing downtime because of inadequate inventory. This solution includes tools for monitoring and controlling inventory levels and automating purchasing and inventory management.

Increased warranty recovery—Infor EAM helps customers improve their tracking of repairs eligible for warranty claims. Warranty repairs can be flagged and a warranty claim automatically created after the repair is completed. Increase equipment uptime—Infor EAM helps improve asset performance so that customers can avoid costly downtime in production or service operations. The solution makes it easy to forecast likely failure points and the reasons for them, and identify and model the best alternatives.

Improve reliability and risk management—Infor EAM helps customers anticipate and reduce asset reliability and regulatory risks. It includes tools for in-depth asset profiling; efficiently building user-defined reports; using electronic signatures; tracking changes to data, comments, and attributes; and monitoring, modeling, and forecasting performance against key performance indicators (KPIs).

SEE RESULTS NOW.

Infor is committed to System i and our many customers who have solutions running on that platform. We believe in solution development that is evolutionary, not revolutionary, so you can:

- ▶ Protect and leverage your current IT investment
- ▶ Realize a lower total cost of ownership
- ▶ Benefit from enterprise solutions that will evolve with your business
- ▶ Implement new solutions at your own pace

THERE IS A BETTER WAY.

At Infor, we work with a core belief. We believe in the customer. We believe that the customer is seeking a better, more collaborative relationship with its business software provider. And a new breed of business software: created for evolution, not revolution. Software that's simple to buy, easy to deploy and convenient to manage. Our 70,000 customers in more than 100 countries stand with us. We look forward to your sharing in the results of our belief. There is a better way. For additional information, visit www.infor.com.
