

Reduce the time and money you spend managing construction plans with ProjectDox.

PROJECTDOX

GO PAPERLESS.

Taxpayers increasingly demand efficiency and value for what they pay to their local and state governments. Your agency can't readily add new staff to manage paper-based construction plans and monitor the approval process. You need a state-of-the-art ePlan system that handles the entire submission, review, tracking, and storage process as a whole so that you always know the status of projects in process and don't waste time trying to sort, organize, and find paper plans. You also need quick access to information from your permit process to speed decision making and help cope with emergencies.

GOVERNMENT SOLUTIONS WITH GLOBAL EXPERIENCE.

You can't shoehorn government requirements into a private sector solution—your solution should fit you from the start. Infor™ Hansen solutions were created from the very beginning to meet the demands of public agencies. As part of the Infor family, Infor Hansen solutions benefit from constant new development investments and exciting enhancements based on open standards and advanced web services to give you maximum power with complete flexibility. You'll get the best of all worlds with Infor Hansen products—government-specific solutions from a global software provider with 25 years of experience.

MAKE BETTER DECISIONS FASTER.

ProjectDox is a document workflow solution that lets citizens and government personnel initiate and complete the construction plan submission, review, and approval process online. When you add ProjectDox to your Infor Hansen solution, you'll have a completely seamless process for managing every aspect of the construction plan submission process. ProjectDox features customizable workflows designed for establishing electronic bids, requests for information (RFI), and change order processes. You'll save more than the cost of paper when you use ProjectDox—you'll also eliminate the cost of printing blueprints and other expensive documents, along with the cost of delivering multiple copies to many different destinations. You'll also have:

- ▶ Integration with the Infor Hansen Community Development and Regulation solution.
- ▶ Flexible configurability now and in the future with on-premises or cloud deployment.
- ▶ SharePoint integration.

Teamwork will also improve with the help of ProjectDox's automated workflow, collaboration view, and markup tools. You'll give more complete, current, and accurate information to everyone in your agency, which streamlines everyone's work and reduces paperwork drudgery. When your department works with digital files rather than paper, electronic plans can be distributed instantly in emergencies by first responders, and used immediately to save lives and preserve order.

ProjectDox works in tandem with Infor Hansen software to help automate the planning process. When a citizen, architect, engineer, or contractor submits an application for a construction or land use permit requiring drawing plans or other documents, ProjectDox uses the permit application email information to invite the applicant to a "project." The applicant can upload electronic plan files to that "project." Review department personnel then have access to all planning documents, and can add markups and comments, which then go back to the applicant for revision.

AIM FOR GREAT RESULTS.

With ProjectDox, your agency can easily create and extend a secure environment for critical project information management, including bid, RFI, and Change Request or Order management. As a result, you'll:

- ▶ Centralize information access and distribution.
- ▶ Streamline, customize, and automate workflow.
- ▶ Make better decisions faster.
- ▶ Reduce project risk.
- ▶ Lower overhead costs.

You'll have a comprehensive ePlan system that improves your planning process and cuts costs. You'll also help your community stay competitive, provide better service, and attract new commercial businesses.

ABOUT INFOR.

Infor is a leading provider of business software and services, helping 70,000 customers in 125 countries improve operations and drive growth. To learn more about Infor, please visit www.infor.com.
