

around the world get more value and longer service life from their capital assets, including everything from buses and heavy equipment, to building systems, system components, and critical parts.

- **Analyze system performance, trends, and conditions.** You'll gain detailed, real time understanding of system demands, accident patterns, capacity constraints, and other critical information with the help of Infor analytics software. With its innovative technology and intuitive interface, Infor analytics software makes the complexity of your transportation system easier to understand quickly, so that you can take prompt, effective action. It's easily configurable by end-users to show the dashboards, data summaries, and trends that are most important for their daily work. You can also build asset sustainability, reliability, and criticality criteria into your analytics to improve capital planning, maintenance scheduling, and cost control efforts.
- **Improve reporting for federal, state, regional, and local authorities.** You can reduce the time and effort you put into assembling reports and studies with the help of Infor reporting solutions. By integrating reporting technology into your administrative and financial systems, Infor software frees you to focus on strategy rather than weighing you down with administrative details.
- **Upgrade your workforce management.** Your workers in the baby boom generation are reaching retirement age, which makes recruiting and retention more important than ever. You can make your workforce management process more consistent and efficient with the help of Infor workforce management solutions. You'll be sure that you've assigned your

staff effectively, maintained all certifications, and acquired needed qualifications to keep your organization running smoothly in the long run.

- **Streamline procurement and supply purchasing.** You'll be ready to take a more strategic approach toward procurement and accelerate every step of your supply management process with Infor's supply chain management solutions. You'll gain automated management of supplier relationships, so you can take control over spending.
- **Add mobile capabilities for quicker response.** Take advantage of mobile communications tools to get more work done remotely. Infor technology supports flexible, adaptable technologies for extending your solutions for use on popular mobile devices including laptops, tablets, and smart phones.
- **Incorporate GIS features for greater accuracy.** Make the most of GIS technology for mapping and tracking assets, using multiple data layers, to incorporate the power of GIS in your asset management planning, scheduling, maintenance, and operations efforts.

## Solve tomorrow's challenges today

Infor Public Sector solutions can make the difference between struggling with a harsh status quo and keeping your transportation plans moving forward for the long term. If you prepare today, you can keep your citizens moving safely and reliably for many years to come.
