

You can trust Infor Public Sector solutions to help you work smarter and consistently meet your goals.

PUBLIC SECTOR

TOP PERFORMANCE FOR GOVERNMENT.

Government duties aren't optional—your responsibilities continue around the clock, sometimes involving life and death choices. You're faced with managing an aging infrastructure to deliver important, day-to-day services, with decreasing budgets and workforce. You need software designed specifically to support your efforts to serve the public effectively, without squandering scarce resources. Citizens today expect the same level of service from public agencies that they routinely encounter in their daily commercial transactions, so you need systems with the level of sophistication that your citizens already take for granted.

PUBLIC SECTOR SOLUTIONS WITH GLOBAL EXPERIENCE.

You can't shoehorn government requirements into a private sector solution—your solution should fit you from the start. Infor™ Public Sector solutions were created from the very beginning to meet the demands of public agencies. Since joining the Infor family, these solutions have benefitted from major new development investments and exciting enhancements. You'll get the best of all worlds with Infor products—government-specific solutions from a global software provider with 25 years of experience and the support of the world's leading system integrators. We serve customers just like you in organizations of every type and size. We not only serve government agencies of every type, we provide support around the clock in hundreds of countries around the world.

INFOR™

THE INFOR DIFFERENCE.

One-size fits all solutions rarely fit anyone. At Infor we match you with the right solution to fit your situation—we configure our solutions for your exact needs so that you can facilitate consolidation, recover all available revenue, and get maximum performance and value from your capital assets.

With Infor, you gain the power to combine your Infor Public Sector solution with the best features of industry leading solutions such as asset management, regulatory and compliance management, billing, performance management, and enterprise performance accelerators, so that you'll always have a way to serve your citizens better.

Our asset management solutions give you visibility into the condition and location of your assets. Managing your assets' energy use will help you operate your assets at peak efficiency and achieve your environmental sustainability goals for performance and consumption.

Our regulatory management suite will help you manage your regulatory, compliance, enforcement, and licensing requirements from all perspectives of the regulating agency and regulated body.

Your citizens move in and move out, but your services don't. That's why we organize our billing solution by location rather than by customer accounts—it helps you manage service billings more accurately and easily because it corresponds to the way you actually provide your services.

Our unique enterprise approach integrates GIS functionality, a must have for government solutions, consistently across all of our solutions. You'll also improve your ability to comply with regulatory requirements and outstanding enforcement actions, and you'll improve management of water and sewer accounts, water meter asset condition history, and billing accounts.

We've put special emphasis on helping agencies that want to consolidate IT resources, reduce IT complexity, lower costs, and improve performance. Our cloud computing offerings can reduce your IT support requirements even more to lower your costs and improve your flexibility.

FOCUS ON PROCESS FOR GREAT RESULTS.

You'll simplify your business process with Infor Public Sector solutions and prevent costly mishaps that happen when the left hand doesn't know what the right hand is doing. You'll also find that nothing gets lost or forgotten when everyone in your agency knows where to find critical information and where to update that information when necessary. Most of all, you'll streamline and accelerate the way you work, so that you can stay on-plan and fulfill your mission every day, day after day.

ABOUT INFOR.
