

# Infor Risk and Compliance Integration Adapters and Tools

## Safe, secure data extraction

The Infor® Risk and Compliance (Approva) solution provides Integration Adapters and Tools that automate data extraction and are built using the guidelines provided by the monitored application. Adapters are certified for use through a rigorous certification process. A multitude of technologies, such as ODBC, JDBC, APIs, .NET connector, Java connector, and ION Connect, are used to connect and extract information from the monitored system. A secure user account with adequate permissions to extract information from the monitored application tables, along with permission to run the module, is required to execute the data extraction.

## Minimal performance impact

Infor Risk and Compliance Integration Adapters and Tools allow you to extract large data sets without compromising the performance of your monitored application system. Configuration parameters allow you to control:

- Size of the database query
- Size of the processing tables
- Size of the output xml files

Tools are provided to configure parameters externally and tune to protect the system without compromising performance. When an extraction is initiated, these parameters, along with information about the tables, fields, join conditions, and query filter, are sized into smaller chunks to prevent any performance impact on the monitored application system.

**Infor Risk and Compliance Integration Adapters and Tools automate the extraction of transaction, configuration, and user-access data from the monitored application. This reduces the amount of time and effort your IT team spends extracting data to support internal controls testing.**

## Certified adapters

Infor Risk and Compliance Integration Adapters and Tools conform to standards and guidelines. Stringent checks are performed ensuring compatibility with the monitored (ERP) application system. Rigorous tests and certification is performed ensuring reliability and performance. Prebuilt and certified adapters are available for the following business applications:

- Infor Lawson
- Oracle® E-Business Suite
- Oracle PeopleSoft
- SAP® R/3®
- SAP ERP Central Component (ECC)
- SAP Enterprise Portal
- SAP NetWeaver
- SAP Business Intelligence
- SAP Customer Relationship Management
- SAP Supplier Relationship Management
- SAP Supply Chain Management
- SAP Solution Manager
