

# Infor10 ERP Business Mobile (SyteLine)

## *Do business better.*

Today, your business causes you to be in constant motion. Successful companies are investing in mobile tools to keep their people on the move—with the information they need to do their jobs anywhere, and that includes vital ERP data. Now it's possible for a wide range of users to access information on their mobile devices with Infor10™ ERP Business Mobile (SyteLine), and to interact easily with content that is tailored to their specific roles and functions. With ERP Business Mobile, your people can quickly visualize their mobile business and manage their daily processes, while keeping up with the tempo of their workday.

## *Mobile any way you want it.*

With Infor10 ERP Business Mobile, users can dive right into their ERP information, fueling informed decisions and real-time actions. Now everyone from executives, controllers, salespeople, production supervisors, and IT administrators can work, plan, solve issues, and make smart decisions quickly, wherever they go. Because ERP Business Mobile is browser-based, it's not restricted to any particular device, so your people can work the way they want to, on the devices that are most convenient for them, whether tablet or smartphone. What's more, you can tailor content and functionality depending on the role of the user, so you offer streamlined views to help your people get their jobs done.

## *Tailored to key roles and functions.*

The Infor10 ERP Business (SyteLine) was a key driver in the birth of Infor's corporate mobile strategy, Infor10 Motion, providing a key foundation for core ERP access on any device. ERP Business Mobile is purpose built for key mobile roles within the organization, including:

### **Executives**

For quick reference, view key values for Cash Balance, Today's Bookings, Today's Shipments, and Order Backlogs. You can also link to an Accounts Payable and Accounts Receivable page for all the pertinent information you need. In addition, you can keep tabs on:

- *Executive Sales*—View graphs that show Pipeline by Territory, Pipeline by Stage, Bookings by Territory, Bookings by Product Code, Percentage of On-Time Shipments, and Product Code Margin Percentage. You can also view a grid listing the Top Grossing Customers.
- *Purchasing*—Link to a Purchasing Funds Committed grid that summarizes outstanding POs per customer and the total summarized, unvouchered PO line values, as well as a time-phased Purchasing Cash Impact graph showing unvouchered PO line values.

*Give your people an easy-to-use solution for staying connected with their jobs, wherever they go with Infor10 ERP Business Mobile (SyteLine).*

- *Inventory Value*—View a graph of inventory value for the last four months.
- *Alerts*—Subscribe to alerts that notify you when an order for a specified customer is overdue, a specified account is over budget, or an order line for a customer is projected to ship late. You can spring into action wherever you are to be sure your customers are satisfied.

### Controllers

Link to Accounts Receivable and Accounts Payable information, as well as a General Ledger Account Balance page that displays account balance information for the selected account and starting/ending periods, a time-phased Cash Impact Grid for certain transaction types, and a Cash Impact Graph. You can also stay updated on:

- *Inventory Value*—See a graph of inventory value for the last four months.
- *Purchasing*—See summaries of outstanding POs per customer and the total summarized, and a time-phased Purchasing Cash Impact graph showing unvouchered PO line values.
- *Alerts*—Be notified when a specified account is over budget, any customer goes on credit hold, material is over-issued for a job, or a transaction for a specified account is over a specified amount. The Controller home page also displays key values for quick reference regarding Cash Balance, A/R Balance, A/P Balance, Today's Bookings, Today's Shipments, and Last Stage Pipeline.

### Salespeople

View key values for quick reference including Commission Due, Last Stage Pipeline, and Last Stage Commission. You can also view at a glance:

- *Leads and Opportunities*—See lists of leads and opportunities per salesperson, with easy drilldown for more details.
- *Opportunity Tasks*—View a calendar with the date of any existing task. Click on the date to display a link that lets you drill down to the Opportunity Task Details.

### Infor10 ERP Business Mobile (SyteLine):

- Puts Infor10 ERP Business in the hands of your users
- Brings your office to where you do business
- Keeps you in touch for real time decision making
- Provides easy-to-use data for five key enterprise roles
- Works on almost any device with a browser
- Lets you easily customize screens

- *Customers*—Select a customer and then click one of the links to see Orders (where you can click a link to drill down to Order Lines), Estimates, Customer Sales Contacts, Customer Interactions, and Customer Addresses.
- *Prospects*—Select a prospect and then click to see Estimates, Prospects Sales Contacts, Prospect Interactions (select a highlighted date from the calendar to display interactions that are linked to that date, which you can click on to display Prospect Interaction Details), and Prospect Addresses.
- *Alerts*—Subscribe to alerts that notify you when a customer or order is on credit hold, an order has shipped for a specified customer, a lead has been assigned to you, an opportunity or follow-up is due, or an order line is projected to ship late.

### Production Supervisors

Views into critical production status give production supervisors the ability to be notified and resolve issues as they occur even when away from their desks. You can configure alerts in certain unexpected cases such as when the material issues are more than required or when the actual labor hour posting is more than planned. You can select a job and see all the materials required to perform it. Using the production calendar, you can view planned production projects for today or any day in the future, and easily scroll through all the operations required for the projects.

The Production Supervisor receives important alerts when:

- A job is projected late for a specific customer
- A transaction reports that job material is greater than planned
- A transaction reports that job operation hours are greater than planned
- A transaction reports that the quantity completed is greater than released

You can also quickly link to detailed job information:

- Jobs to Complete
- Jobs to Release
- Jobs Completing Late
- Job Labor Status

### **IT Administrators**

Identify and resolve various issues in order to provide a stable and responsive IT environment, whether you're on site, off site, or temporarily away from your desk. You can create a list of services to be monitored and the solution can trigger an alert to your mobile device when one of these services is stopped or not responding. You can view the list of services you're monitoring on your mobile device and perform tasks like start, stop, or restart the service, if required.

The IT Administrator or IT staff receives critical alerts when:

- A user is locked out of the system
- A service stopped running
- A long-running background task may need to be killed
- Disk space (or other system resources) have reached a limit that you can specify

## *See results now.*

Access to your ERP system while in the motion of your workday is key to staying ahead today, keeping people connected to their jobs like never before. Infor10 ERP Business Mobile offers a new way for your employees to access job-specific information from their mobile devices, in pages that are easy to view and easy to interact with. The result:

- Greater productivity
- Better customer service
- More proactive management
- Real-time decision making, without "when I get back to the office" delays
- Smarter planning

With specific content tailored to five key roles within your organization, Infor10 ERP Business Mobile also lets you easily customize forms to further satisfy individual preferences. It all adds up to a solution that keeps your organization moving at the pace of business today.

## Powered by Innovative Technology

Infor's newest technologies bring our portfolio of proven products to new levels of power, usability, and flexibility. Some of these technologies include:

### INFOR10 WORKSPACE

You don't need more information; you need the right information at the right time. Unified navigation, single sign-on, and single-click access to Infor systems, personalization, web parts, and shortcuts get you to the information you need quicker and easier. You'll have everything you need to work on what matters, in a way that makes sense to you, so you can simplify your work day.

### INFOR10 ION SUITE

The unifying platform to connect and manage your applications, Infor and non-Infor. Seamless, flexible integration between your current core applications and your third-party solutions, whether they're on-premises, in the cloud, or both. Identify your key business processes and let the exceptions find you—automatically alert your users based on key issues so they can keep their finger on the pulse and respond immediately. With Infor10 ION Suite, your systems and your people can simply work together.

### REPORTING AND ANALYTICS

Through the Infor10 Business Vault, everyone has the same solid data in the right application. Dashboards deliver actionable information based on your role, so you get the information you need for your job, the way you want to see it, when and where you need to see it. And then you can turn that information into insight with multiple, analytical views on your performance.

### CLOUD DEPLOYMENT

With no upfront installation costs and the ability to use the same powerful, proven business applications in the cloud or on-premises, you realize faster time to value and unprecedented flexibility to start out in the cloud and stay there, or to move to on-premises when it makes sense for your business.
