

Infor10 ERP Business Shipping & Logistics (SyteLine)

Streamline every process.

For discrete manufacturers today, the demanding business environment leaves no room for errors or inefficiencies. You need to manufacture high-quality products with tight inventory management and super-efficient production. But the need for excellence doesn't stop once finished goods arrive at your loading dock. Shipping finished products to customers on time and at the lowest possible cost can contribute as much to your overall success as producing the right product at the right cost. That's why many discrete manufacturers are seeking ways to streamline their supply and logistics processes to reduce costs and improve customer service levels.

Rely on experience.

To help discrete manufacturers meet the need for excellence in shipping and logistics, Infor™ has developed Infor10™ ERP Business Shipping & Logistics (SyteLine). The solution provides enhanced shipping, warehouse, and logistics capabilities for companies using the ERP Business solution. Shipping & Logistics helps accelerate and simplify the picking, packing, and shipping processes for engineer-to-order, configure-to-order, and highly repetitive manufacturing companies.

Enhance to suit your needs.

Infor10 ERP Business Shipping & Logistics features a modular design for easy installation without modifying your ERP Business solution. Users get powerful new shipping tabs in key ERP Business screens to better manage shipping processes. Your customers get more flexibility in tracking their shipments and your company benefits from advanced capabilities for shipping the goods you manufacture.

Infor10 ERP Business Shipping & Logistics (SyteLine) helps accelerate and simplify the picking, packing, and shipping processes for engineer-to-order, configure-to-order, and highly repetitive manufacturing companies.

Improve your business performance in numerous ways. You can:

Improve visibility. Using a visual workbench, quickly view shipments by due date, priority, shipment type, customer groups, or user-defined group.

Automate shipping processes. Reduce many manual steps by automating core shipping-related tasks and reducing associated paperwork.

Give employees more flexibility. Give user access via a web browser to view shipping schedules in real time and easily verify orders to ship. They can print labels and paperwork, including a bill of lading and export paperwork. The system instantly captures freight costs and tracking numbers and automatically sends email notifications. Also, employees can leverage wireless/radio frequency (RF) technology to manage real-time warehouse and barcode scanning.

Deliver new services to customers. Respond to customer requirements for special labeling, paperwork, and other services. In addition, customers can track their shipments via a web browser.

Scale the solution to fit your needs. Get flexible and scalable packages to fit your business:

- **Standard shipping.** Get workbenches for pick-pack-ship, UPS/FedEx integration, less than truckload (LTL)/truckload planning and paperwork, documents, inventory staging, auto shipping, and web portal and web reports.
- **Advanced shipping.** Use additional functionality for carrier selection, contents packing, export shipping and paperwork, lot/serial tracking, LTL contracts and rating, freight quotes, load/route planning, transfer order shipping, and miscellaneous shipping.
- **Shipping, warehouse, and mobile.** Take advantage of a complete shipping, warehouse, and mobile solution with additional capabilities for using wireless/radio frequency (RF) barcode scanning, inventory allocation, capable to ship services, and kitting.

Gain advantages quickly.

Infor10 ERP Business Shipping & Logistics can enhance your business performance and results in many ways, including:

- Fewer errors
- Lower costs
- New, enhanced services
- Improved customer service
- On-time delivery
