

SoftBrands Visual Restaurant solution lets you provide the best table service while accurately controlling stock levels and the movement of goods. It offers optimum functionality and simplicity for stock management and point-of-sale transactions, helping you improve service, productivity, and ultimately the profitability of your restaurant.

The system works as a standalone or can be centralised for multiple restaurants.

## SOFTBRANDS VISUAL RESTAURANT

### PROVIDE HIGH QUALITY SERVICES.

#### Order taking.

- ▶ All functions are managed from the touch screen. You can customise the different buttons as much as you need to meet your requirements perfectly. Icons, colours - everything is there to make it user friendly.
- ▶ Tariffs can be automatically updated depending on the season or the time.
- ▶ You can automatically update your product offer as often as needed (such as for a day of the week or weekend) and manage your special offers (such as happy hour or room service). Plus, you can set up to 64 different selling prices per item.
- ▶ You can also secure your drinks distribution with connection to third party systems or devices (e.g. beer and soft drink barguns or electronic spirit dispensers).
- ▶ SoftBrands Visual Restaurant can be interfaced with different ERP (Enterprise Resource Planning) solutions to optimise your global management. For instance, accountancy, hotel reservation or outdoor leisure solutions.

## Follow up.

- ▶ Tables are allocated to waiting staff at the beginning of each service.
- ▶ Each waiter can easily track their tables and progress at a glance: number of customers, products ordered, dishes on hold, method of payment.
- ▶ The table plan allows service rotation optimisation, with fast access to the table reservation display and identification of free tables.
- ▶ From the touch screen you can interact with the kitchen or other service areas at any time.
- ▶ Staff identification is easily managed and secured, allowing user identification for each operation, with differing access levels if required.
- ▶ Storage and follow up of information such as cancellations, modifications and discounts is all available.

## Billing.

- ▶ With SoftBrands Visual Restaurant, every action is automatically added to the bill. You cannot forget anything and can access all open bills at all service stations.

- ▶ Capacities include full adaption to each food service type on the same system (bar, table service, boutique, take away and so on) and ticket personalisation (header and footer).
- ▶ Bills can easily be split by amount, by item or by individual customer.
- ▶ Different VAT rates can be handled.
- ▶ Invoices can also be prepared on a handheld device and adapted to all type of activities: bar, indoor, outdoor and so on.

## A PARTNER TO BOOST YOUR REVENUE.

### SoftBrands Restaurant Pocket POS, handheld order taking.

- ▶ Improve service rotation
- ▶ Increase customer care quality
- ▶ Boost staff productivity

## DECISION MAKING SUPPORT FOR MORE STRAIGHTFORWARD MANAGEMENT.

### Statistics and reports Qualitative and quantitative analysis to take informed decisions.

- ▶ ROI analysis on each product sold.
- ▶ Quantitative and qualitative analysis of your suppliers.
- ▶ Analysis by predicted and actual turnover.
- ▶ Inventory and stock reports.
- ▶ Analysis by month or other period at any time.
- ▶ Automatic control edition at each business closure will save you precious time.
- ▶ Easy data export to Word, Excel or PDF.

## Choosing SoftBrands Visual Restaurant means:

- Performance-Reliability-Security
- Flexibility-User friendliness

### BE IN CONTROL OF YOUR STOCKS.

The more demanding you are, the more the inventory module will give you.

The stock control module works on three main inputs: **order/delivery/invoice.**

- ▶ One system to manage multiple storage and multiple points of sale.
- ▶ Statistics on purchase volumes month by month.
- ▶ Automatic monthly closure.
- ▶ Integrated inventory control module management of simple items sold by the unit.
- ▶ Management of closely-related items (such as ingredients for recipes).
- ▶ Update of stock quantities each time a product is sold and automatic refilling for the point of sale.
- ▶ Purchase statistics.
- ▶ Storage for specific events, with no impact on the automatic order flow.

### DEDICATED FUNCTIONALITIES FOR MULTIPLE RESTAURANT MANAGEMENT.

- ▶ Manage all your restaurants from one central point, and replicate set parameters, menus, tariffs touch screen set up etc. without having to input for each outlet. You can also input geographical specifications.

- ▶ Analysis and statistics at group level.
- ▶ Remote access to all restaurant activities in real time via a secure Internet connection.

### Solution available in ASP/SaaS model

The SaaS model is rental based and includes licences, data backups and maintenance, as well as software application updates.

- ▶ High security and data availability
- ▶ Lower hardware investment
- ▶ Budget control

### THERE IS A BETTER WAY.

We work with a core belief. We believe in the customer. We believe that the customer is seeking a better, more collaborative relationship with its business software provider. And a new breed of business software: created for evolution, not revolution. Software that's simple to buy, easy to deploy and convenient to manage. Our 70,000 customers in more than 100 countries stand with us. We look forward to your sharing in the results of our belief. There is a better way.
