“ Infor Consulting Services has very good product knowledge which helped us achieve a quick and hassle free implementation.”

Anil Goenka, Project Manager, Century Metal Recycling

About the company

Century Metal Recycling (CMR) is the largest producer of aluminum-based die cast alloys and zinc alloys in India, with an annual production capacity of 145,000 MT for aluminum alloys and 16,000 MT for zinc alloys. It has a 20 percent market share with a turnover of 1,200 crore rupees through the most advanced plants in the country located at Palwal, Haridwar, Gurgaon, Bhiwadi and Manesar. The state-of-the-art technology plant at Tatarpur, near New Delhi, was imported from Europe and is the first and only aluminum recycling plant in India to deploy many high-end technical features, such as a shredder, an eddy current separator, a de-coater, metal circulation pumps, and high capacity melting furnaces. Business case

- Achieve greater operational efficiency.
- Reduce costs with process integration.
- Attain a more competitive position in a tough market with better managed inventory levels.
- Improve management decision making by providing more accurate real-time data.

Why Infor? Infor delivers:

- An integrated system that replaces all previously distributed systems, which makes it possible to reduce costs and eliminate many operational issues.
- Real-time visibility into data, so management can make better, more timely decisions.
- In-depth product knowledge and excellent support from Infor Consulting Services, to help achieve a successful implementation.
