

Lava Supply Chain Solutions Gains Speed with Infor10 Supply Chain Execution

INFOR™

Challenges:

- Keep pace with increasing volume and complexity of customer demands.
- Accurately predict inventory needs.
- Provide more on-target forecasting of sales numbers.
- Deploy a flexible, scalable warehouse management system quickly and easily.

Benefits:

- Underwent a smooth implementation of an Infor™ warehouse management system, followed by fast and easy upgrades up to the current Infor10 Supply Chain Execution solution.
- Achieved ability to easily meet customer demands.
- Improved communication and collaboration within the company and with suppliers.
- Significantly improved supply and demand visibility as well as sales forecasting.
- Increased number of customers and sold items through barcode scanning.
- Provided largest customer with real-time access to the solution, increasing customer satisfaction.
- Gained tremendous flexibility and scalability to easily add new customers and set up a new warehouse.

“When we learned about Infor10 Supply Chain Execution’s capabilities, it was an easy decision to upgrade. Each Infor upgrade process we’ve made has gone smoothly, and Infor’s implementation group has been very responsive to our requests. We’re thrilled with what Infor10 Supply Chain Execution can do.”

—DAVE SCHROEDER, VP OF OPERATIONS AND IT, LAVA SUPPLY CHAIN SOLUTIONS

Facts at a glance.

Products: Infor10™ Supply Chain Execution

Industry: Transportation & Logistics

Country: USA

“We’ve quickly gained process efficiency improvements, especially in productivity from using barcode scanning, which we use extensively. Last year, we scanned about 10 million serial numbers into our operations, and so far already this year we’ve increased our numbers significantly.”

—DAVE SCHROEDER, VP OF OPERATIONS AND IT,
LAVA SUPPLY CHAIN SOLUTIONS
