“ Infor Cloverleaf can handle our current and future needs because it’s scalable. We wanted the control and flexibility to translate X12 and other data files on our own and to stop outsourcing that service.”

Carl Gattuso, Chief Corporate Officer, Virginia Premier Health Plan

## About the company

Virginia Premier Health Plan, Inc. is a not-for-profit Managed Care Organization owned by the Virginia Commonwealth University Medical Center. Virginia Premier was formed in 1995 to coordinate healthcare for low-income people, and it maintains a local community presence by having offices across the Commonwealth. ## Business case

- Translate millions of ASC X12 and other claims and enrollment files.
- Eliminate the contract with a third party used to translate X12 data.
- Ensure accuracy of translated data files.
- Refocus IT staff from interpreting data files to more strategic activities by providing claims and enrollment staff with translated files in an understandable format.

## Benefits

- Gained flexibility to translate X12 and other data at Virginia Premier using Infor Cloverleaf; eliminated the use of a third party for data translation.
- Saved costs associated with outsourcing X12 file translations with Infor Cloverleaf.
- Reduced time IT spends interpreting X12 data for claims and enrollment staff.
- Refocused IT team’s attention on more strategic tasks with accurate, streamlined data translations for Virginia Premier claims and enrollment processes.
