

Infor Data Migration Accelerators

Efficiently migrate data between your systems

Infor® Data Migration Accelerators provide you with a backbone of data orchestration and management to get your new systems up and running quickly. With Infor Data Migration Accelerators, you can easily transform your data between systems in the event of a business change, such as a new system purchase, IT modernization, landscape transformation, or any other conversion that requires the migration of data between systems.

Key benefits

Built on the Infor Data Stewardship Platform, Infor Data Migration Accelerators take advantage of shared data assets, quality processes, built-in best practice methodology, and a modern process for data transformations. The software oversees managing the tasks, roles, schedules, reporting, and data involved in completing on time, within-budget, and successful migrations. Infor Data Migration Accelerators are available for Infor Lawson, Infor EAM, Infor M3, and Infor LN.

Additionally, Infor Data Migration Accelerators:

- Speed time to productivity on your new systems.
- Assure compliance is kept for both internal and external standards.
- Maximize trust in data throughout the landscape.
- Ensure all of your data is business-ready, i.e., ready to run the processes of the business.
- Reduce software complexity and cost through orchestration over migration processes.

Speed up data migrations

Our powerful data management solutions efficiently orchestrate the process of data migrations and empower your stakeholders to easily manage any data transformation activity. Infor Data Migration Accelerators reduce data migration cost, complexity, and risk to drive fast time-to-value in new systems, system consolidations, transformations, and spin-offs by providing you with:

- Visibility and orchestration across the data migration process
- One single source of truth for migration decisions
- Automation for efficiency and ease of use and to enable reuse
- Repeatable, best practices with centralized reporting and segmented/targeted data
- Services that are complementary to any extract, transform, and load (ETL) tool

In addition, the services provided with Infor Data Migration Accelerators include:

- Data strategy and quality
- Migration QuickStart
- New system and data transformation
- Enterprise data awareness and planning
- Enterprise information and data strategy engagement
- Archiving assessment and services

Experience industry-leading functionality

The functionality built into Infor Data Accelerators can help you gain visibility into your data, improve the design of your systems, execute on your needs with process and execution tools, and enforce data policies.

Visibility

- Single console provides oversight across all migration activities, processes, tasks, roles, reporting, and schedules.
- Graphical dashboards provide easy, real-time views into status and issues.
- The Infor Data Stewardship Platform offers views and access to all data quality, data transformation and information governance, and application data.

Design

- Helps your users create designs for target systems and reuse them in downstream projects with target data design.
- Supports full web-based data mapping facility.
- Provides easy data construction and enrichment for missing or required data.
- Offers access to all data sources, including legacy data.
- Supports your business requirements with fully configurable tools.
- Scales to meet changing business environments.

Process and execution

- Provides project execution, which includes the “critical path” management of teams, forms, tasks, and metrics with built-in Microsoft® Project interface.
- Supports data integration process management, including the ability to task external tools.
- Offers real-time change data capture for data immediacy and accuracy.
- Allows the execution engine to easily run the entire migration process and automate the use of ETL tools.
- Supports controlled, repeatable processes.

Enforcement of data policies

- Offers data validations that take advantage of both application and business rules.
- Supports harmonization to ensure data is consistent, complete, and accurate for use.
- Enforces data rules and audit controls.
- Supports rapidly changing project environments.
- Supports a faster data lifecycle by reducing testing and remediation cycles.

Quickly move to new systems

Infor Data Migration Accelerators give you the automation, guidance, and orchestration to efficiently migrate to your new systems. Unlock your greatest business value from new and upgraded systems faster and with less risk with Infor Data Migration Accelerators.
