

Infor Data Stewardship Platform (DSP)

Master your data governance orchestration needs

The Infor® Data Stewardship Platform (DSP) provides you with information governance orchestration across data migration, archival, quality, analytics, master data management, and business process governance. Infor DSP ensures management control, maximum reusability of content, and complete visibility into—and simplification of—your most complex enterprise data programs.

Key benefits

Infor DSP helps you design, set, execute, and enforce data policies across all data and systems in your organization. It creates an environment of collaboration, connecting your IT and business users in a “decide once and reuse everywhere” environment. This enables you to benefit over and over again from prior efforts and easily improve the governance of your data ecosystem. Infor DSP:

- Delivers trusted data with reliable results and low risk.
- Assures data accuracy from proven rules.
- Improves time-to-completion of complex programs.
- Reduces manual effort, services spend and data complexity through powerful automation.
- Provides an innovative, context-aware approach to managing complex data.
- Addresses current requirements of social, mobile, the cloud, and Big Data.
- Solves data design issues once and distributes solutions globally.
- Optimizes better use of resources and time.
- Turns tools that may have been used for one-off projects and applies them into a robust data governance business process.
- Is architected to support your product roadmap.

Gain end-to-end visibility on one platform

Infor DSP provides context-aware “connective tissue” across global projects, with end-to-end visibility and management, from executives to business owners. In addition, Infor DSP:

- Provides the backbone and common utilities for applications like dspMonitor™, dspMigrate™, and dspCompose™.
- Delivers passive data governance, business process governance, and best practices.
- Adds value to active data governance tools, analytic and in-memory platforms, and real-time analytics.

Make your data work harder

Infor DSP is easy-to-use with a simple, web-based interface that offers full multi-language and localization capabilities. With Infor DSP, you can:

- Set, enforce, and execute data policies.
- Control data quality management and error remediation.
- Create a centralized target data design.
- Automate the design, process, and execution of data transformation and migration activities.
- Auto-generate migration code.
- Access centralized reporting and validation tools.
- Utilize charting and dash-boarding tools.
- Use project tracking automation to control resources, workflows, and tasks.
- Access a management console for project visibility across landscape for all stakeholders.
- Create a full audit of all of your activities.
- Take advantage of rapid, zero-code web form development that is focused on your data activities.

Support your long-term strategy

Infor DSP provides you with a single source of the truth across all of your enterprise data, while also adapting to your business, system, and strategic needs. Infor DSP can help you to:

- Accelerate and improve your ability to achieve enterprise-wide governance over your data and processes.
- Increase ROI by eliminating the duplication of effort.
- Maximize the value of your applications and teams through a standardized approach to data governance and common utilities.
