

Infor Education - Inforum Power Training 2014

Overview

Infor Education offers concentrated training courses in conjunction with Inforum. These three-day courses take place prior to Inforum and offer the opportunity to complete training in a condensed period, as well as take full advantage of Inforum. Power Training class registration will be available when you register for Inforum.

Infor Education Power Training provides our top of the line training sessions plus an opportunity for professional development focused on helping you get the most from your enterprise software suite. All Power Training courses will be held at the Inforum convention center. This event will include:

- Top requested training courses
- Principal instructors
- Condensed training—full course content, less time
- Lunch and snacks during your training days

Take the opportunity to extend your Inforum stay in the unique, historic city of New Orleans and get trained at the same time.

All Power Training courses are offered on the following days:

- Friday, September 12 08:30am to 5:30pm CST
- Saturday, September 13 08:30am to 5:30pm CST
- Sunday, September 14 08:30am to 5:30pm CST
- Breakfast is served every day between 7:30am to 8:30am.

Fee (includes breakfast, coffee and lunch)

- \$800 per day, total cost per course \$2400

Note: Power Training course fees are NOT included in Inforum registration, nor are fees for recommended prerequisite course work. You will not be billed for a Power Training course if you withdraw your registration before September 1, 2014. If you withdraw your registration on or after September 1, 2014, you will be billed for the entire class fee. We can move attendees between confirmed courses if availability allows. Named attendees may be switched by your organization at any time without any additional charge.

Course Titles:

The list below contains the final 9 titles for Power Training courses that are confirmed to run: Each class will maximum have 10 participants and the course “Lawson: Using Process Automation” is already fully booked.

Infor Lawson Enterprise Performance Management:

- Lawson: Using and Administering Business Intelligence
- Lawson: Using Design Studio & JavaScript
- Lawson: Using Process Automation

Infor Lawson Technical:

- Lawson: v10 Administering Security
- Lawson: v10 Administering System Foundation for UNIX
- Lawson: System Foundation Differences 9.x - 10.x

Infor Lawson Procurement

- Lawson: Using Contract Management

Infor Lawson Talent Management

- Lawson: Using Global Human Resources

Infor Technology:

- ION: Solution Design and Administration

Course Descriptions

Lawson: Using and Administering Business Intelligence

The purpose of this course is to provide the information and practice needed to perform Business Intelligence foundation and administration functions. These instructions will provide an overview of Reporting Service, Smart Notification, Framework Services, user management and details on Infor Lawson Business Intelligence learning resources. This training is applicable to Infor Lawson Business Intelligence 10.

Instructor:
Keith Linney

Pre-requisite knowledge:

To optimize your learning experience, Infor recommends that you have the following knowledge prior to attending this course:

- Know how to move freely within a Windows and Infor Lawson environment.
- Know how to move freely within an Infor Lawson server environment

Objectives/Topics:

- Discuss Reporting Services that can publish, burst, and schedule reports.
- Explain the process of using Smart Notification to create and deliver notifications.
- Describe Framework Services that build dashboards to integrate content from Reporting Services, Smart Notification, and other sources.
- Identify Infor Lawson Business Intelligence resources, such as guides, online help, and additional training.
- Describe configuration and administration of Framework Services, Reporting Services, and Smart Notification.
- Explain authenticating, synchronizing, and deleting users.

Lawson: Using Design Studio & JavaScript

Using Design Studio & JavaScript is a course for customers, employees and partners. Attendees will learn about the Design Studio tool, a browser-based drag-and-drop graphical development environment used to customize or enhance Infor applications.

Instructor:

Arvella Garcia

Objectives/Topics:

- What is Infor Design Studio?
- Infor system terminology
- Infor Design Studio
- Portal Page Designer
- UI Designer
- Types of examples
- Wizard Designer
- Directory structure
- Overview of hands-on labs
- Review
- JavaScript programming overview
- JavaScript terminology
- Resources

Lawson: Using Process Automation [fully booked]

Using Process Automation is a 5-day training course where attendees will learn about the components of Process Automation, such as the Process Designer and Process Server. This course provides practical, hands-on experience using the Process Designer and Process Server Administrator.

Instructor:
Tonia Williamson

Objectives/Topics:

- Infor Process Automation Architecture Overview
- Activity Nodes and Infor Process Designer
- Landmark Query Process and Landmark Transaction Update Process
- System Configuration
- Lawson Query and Lawson Resource Transaction Process
- Lawson Query Process
- User Configuration
- Lawson Requisition Approval Process
- Enable Services
- Work Object
- Web Run Process and Custom Activity Process
- HR User Action
- Modify a Landmark Process
- Schedule Processes
- SQL Query and Update Process
- System Command
- File Transfer and Data Iterator File Access
- LTM to Lawson Update
- File Channels, ION, and JMS (Java Messaging Service)
- XML Process
- Web Service
- Lawson Adapter
- Cloverleaf Interface
- Process Automation Administration
- Understanding Dates
- Lawson HR User Action Change
- Data Iterator Landmark Transaction, Lawson Resource Transaction Example, and Lawson Transaction
- Custom Triggers 4 GL
- Custom Inbasket Displays

Lawson: v10 Administering Security

This course covers how to set up security roles, classes, profiles, and rules; how to grant access to data sources, forms, and files; and how to secure printers, job queues, environment services, reports, users, and security. This training is applicable for the Infor Lawson Security version 10.x and 9.x.

Instructor:
Pam Schultz

Pre-requisite knowledge:

To optimize your learning experience, Infor recommends that you have the following knowledge prior to attending this course:

- Experience with Infor Lawson applications

Objectives/Topics:

- New user setup / Views / Security Profile / Data Source Access
- Grant Access to Forms and Grant Access to Files
- Unconditional Access for Action Forms
- Grant Access Forms and Files Security Class
- Grant Access Forms based on Group Membership
- Batch Parameter Control
- Role Inheritance
- Create a Security Class / Condition Rule using both form and table rules
- Group Rules
- Data Control based on Custom Attribute and based on Agent
- Field Control
- Role Override
- Data Control based on Structure and based on Database Information
- Create an All Access Role and Security Class
- Create a Security Sub Administrator
- Securing Printers
- JobQueues / Users / Copy / Reports

Lawson: v10 Administering System Foundation for UNIX

The purpose of this course is to provide the technical foundation necessary for creating customized reports, queries, and applications; modifying existing and custom applications, and for administering Infor Lawson. Additionally, this course provides Infor Lawson Administrators with knowledge of tasks associated with effective implementation and maintenance of Infor Lawson on a UNIX platform. This training is applicable to the Infor Lawson System, version 10 and all previous versions.

Instructor:
Dennis O'Connor

Pre-requisite knowledge:

To optimize your learning experience, Infor recommends that you have the following knowledge prior to attending this course:

- Related UNIX skills and work experience

Objectives/Topics:

- The purpose of this course is to provide technical foundational skills for performing System Administration functions within the Infor Lawson system on a UNIX platform
- Identify Infor Lawson Architecture and directory structure.
- Describe key Infor Lawson System concepts and terms.
- Manage Infor Lawson Servers, system processing and job processes.
- Apply product installation and patching.
- Maintain WebSphere, User & LDAP, Portal and Infor Lawson Security administration.

Lawson: System Foundation Differences 9.x - 10.x

This course explains the differences between versions 9.0.1 and 10 for Lawson System Foundation & Administration

Instructor:
Glen Rexing

Pre-requisite knowledge:

To optimize your learning experience, Infor recommends that you have the following knowledge prior to attending this course:

- Knowledge of Lawson System Foundation version 9

Objectives/Topics:

- Infor Lawson 10 Architecture
- Infor Lawson 10 System Foundation
- Infor Landmark Technology
- Distributed Security Package, Infor Security Services, and Federation Overview
- Authentication and Federation
- User administration and security monitoring
- Maintenance
- Administrator interfaces
- End-user interfaces
- Additional end-user topics

Lawson: Using Contract Management

Using Contract Management is a course for users of Contract Management. Attendees will learn about the core functionality of the Contract Management application, including integration considerations and procurement process practices.

Instructor:
Jean O'Neill

Pre-requisite knowledge:

To optimize your learning experience, Infor recommends that you have the following knowledge prior to attending this course:

- A working knowledge of the Lawson Procurement suite.
- A general understanding of General Ledger is recommended.
- A general knowledge of the Accounts Payable application is recommended.

Objectives/Topics:

- Landmark/Contract Management Architecture and Security Overview
- Contract Management Overview
- Primary and General Setup
- Supplier and Contract Setup
- Item maintenance
- Contract creation overview
- Process variants for creating a contract
- Rebates Setup and Processing
- Tiered Pricing
- Contract Amendments and Administration

Lawson: Using Global Human Resources

Using Global Human Resources is a course for Human Resources Professionals and Human Resources Administrators. Attendees will learn how to set up organization and resource data.

Instructor:
Brenda Alcala

Objectives/Topics:

- Accessing Infor Enwisen Talent Management
- Prerequisite Setup
- Currency Setup
- Plan Your Organizational Structure
- Manager Structure Setup
- Competency Management Setup
- Salary Structures
- Step and Grade
- Overview of Jobs and Positions
- Positions Setup
- Resource Components Setup
- Resource Setup
- Work Assignment Setup
- Base Pay
- Actions
- Reporting

ION: Solution Design and Administration

At the end of this course, learners will have successfully used ION Connect to create a variety of connection points, and document flows, and used ION Process to create monitors that generate alerts, and workflows that generate tasks and notifications.

Instructor:
Russell Simmons

Pre-requisite knowledge:

To optimize your learning experience, Infor recommends that you have the following knowledge prior to attending this course:

- Some system integration experience
- Some SQL experience with RDBMS (class examples will be in MS SQL Server)
- Experience with XML
- Basic understanding of business processes

Objectives/Topics:

- ION Product Overview
- Scoping ION
- ION Installation
- ION Connect
- ION Process
- ION Management and Administration
- ION Related to Other Products for example
