

Infor Analytics for Healthcare

Improve access to vital information

In today's changing healthcare environment, your organization is expected to respond immediately to emerging needs. Your goal is to improve the quality of your clinical care and the viability of your business operations, while streamlining operations and controlling costs. Infor® Analytics for Healthcare can provide vital information to help you effectively manage and support the processes that are critical to your organization's ultimate success, including workforce management, supply chain management, finance, and internal collaboration.

Get the right information at the right time

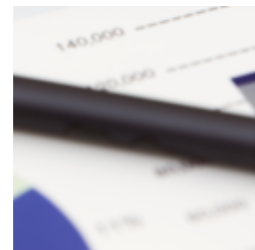

Built for healthcare organizations by healthcare experts, Infor Analytics for Healthcare helps address your most pressing questions about supply chain, labor and staffing, financials, and business operations. You'll better understand, for example, the relationship between staffing and patient wait times or incidents. You'll find new opportunities to standardize supplies to reduce costs. You'll understand how length of stay affects service line profitability.

Control most critical spending, improve patient care

Managing a great healthcare facility means focusing on quality care, attracting and retaining the best talent available, and controlling expenses. Infor Analytics for Healthcare can help you accomplish all those goals and more—with improved visibility into the staffing and productivity issues that affect care givers, as well as costs.

Infor Analytics for Healthcare allows you to:

- Pinpoint supply chain savings opportunities in order to reduce supply costs, agency fees, and overtime expenses.
- Identify any vendors that are adversely impacting clinical staff from doing their jobs effectively.
- Improve decision-making relevant to hiring, scheduling, payroll, and staff development for better management of staff costs.
- Include data from non-Infor sources, such as clinical systems, to better manage costs and quality, while empowering clinicians to focus on patients.
