

Infor Document Management Capture

OCR Engine & Automation Platform

Organizations of all types and sizes struggle with unstructured content, and the manual processes that accompany document processing. Partnering with Ephesoft, IDM Capture is an add-on product to the Infor® Document Management component of Infor OS.

Why customers use IDM Capture

- Lightning fast turnaround on document-centric processes
- Elimination of manual data entry
- Single path for all document sources
- Process more with less

What is IDM Capture?

Capture is a software application that processes documents, intelligently classifying them and extracting data. The documents and data can then be passed onto Infor Document Management through ION API.

Reduce processing time

- Automate document classification and routing
- Automatically extract important document data
- Integration with key enterprise technologies
- Powerful Efficiency

Improve data quality

- Validation engine insures accurate data
- Exception processing queues low confidence documents
- Integration with line of business system technologies provides seamless flow
- Reliable data

Enable Your Content

- All content is searchable with OCR
- Metadata provides actionable information for workflow, compliance and security
- Web services allow for capture enabled applications
- True document enablement

How IDM Capture works to achieve business benefits

Customers save time and money

- Improved efficiency and reduced processing time
- Average of 66% reduction from manual processing
- Faster response times, improved customer service and improved processes

IDM Capture in Azure

- Rapid deployment and minimal time to production
- Scalable, cloud document capture solution
- Faster ROI and reduced time to value

Enhanced platform for automation

- Integration points with Enterprise tools
- Open and modular for true line of business integration
- Centralized, intelligent document automation layer

Built for success

IDM Capture is focused on helping its customers gain great value from technology.

We can help

- Our technology uses machine learning for simplified setup and long term adaptation
- We bring a broad range of document automation and capture experience through pre-sales and services.
- See a demo today, and realize where you can improve any document-centric process
- See our broad set of case studies from existing customers: [Ephesoft Transact Customer Stories](#)

“In terms of billing, what’s great about this solution is that it scans and classifies all of our data. We no longer need to walk over to filing cabinets and look up information in the files. This is a huge benefit.”

Beth Turnbaugh

Director of Billing Operations at RCM

Core use cases

- Easily capture documents from email, scanners, copiers, and folders and route to content services
- Use our Azure Capture as a Service with workflow applications to enable document-centric intelligence
- Extract document data and pass it to line of business or accounting applications

Why IDM Capture?

IDM Capture is on a mission to help Infor customers increase productivity, improve efficiency and receive a substantial ROI through our patented machine learning technology embedded in our document capture solutions. We play a pivotal role for our clients by transforming how they capture, manage and analyze unstructured data.
