

Infor Fashion PLM

Accelerate product innovation

Designed to improve collaboration and shorten time to consumer, Infor® Fashion PLM is an end-to-end solution that connects every aspect of a product's lifecycle. By linking planning, design, development, and execution on a common platform, Infor Fashion PLM delivers a single set of accurate, real-time data that helps increase visibility and provides the foundation for closer collaboration and unified teamwork. With Infor Fashion PLM, you'll have the tools you need to consolidate operations and accelerate product innovation, every step of the way.

Fast-track your success

In today's highly competitive and consumer-driven marketplace, fashion companies are under enormous pressure to create exciting new products at a moment's notice.

By providing a central repository for storing and accessing design and development information, Infor Fashion PLM can help you meet this need for speed, while also making sure new styles and collections are delivered with consistent quality—and at the right time and right price.

Infor Fashion supports some of the world's leading fashion brands.

Collaborate across your value chain

By creating an open environment for creative, technical, and commercial teams, Infor Fashion PLM helps break down silos, so key stakeholders can work together more seamlessly, using the same set of real-time data.

Sharing information with your offices locally and globally, across internal departments and with selected partners, helps increase accuracy and reduce manual data entry, while speeding up your entire decision-making process.

Synchronize planning and execution

Infor Fashion PLM helps you to become a more responsive business by supporting concurrent line planning, style design, technical product development, and manufacturing sourcing.

You can work on multiple collections at the same time and have the flexibility to change directions and fine-tune your individual styles at any stage, without disrupting your momentum.

Connect design with data

Featuring a bi-directional Adobe® Illustrator® plugin, Infor Fashion PLM helps your creative teams work with the tools they know and love.

They can upload new concepts directly into the system and quickly bring those concepts to life through a set of visual libraries, pre-configured templates, and mass-create and update tools.

By connecting creative design ideas to commercial objectives and technical specifications, Infor Fashion PLM helps you

increase accuracy and reduce waste. And, it can even help you commercialize new styles faster.

Enrich your user experience

By combining a beautiful design with an intuitive interface that's similar to Excel®, Infor Fashion PLM offers an industry-leading user experience that helps speed up adoption, lower training requirements, and shorten time to value.

You'll be able to work smarter and faster than ever before with simple drag-and-drop functionality, mass capabilities, and a homepage that can be personalized using widgets.

Integrate with your infrastructure

Built on open standards technology, Infor Fashion PLM can be seamlessly incorporated into your IT environment.

Highly flexible integration capabilities can have you up and running with less disruption and smoother implementation for a more rapid return on investment.

Get advanced fashion-specific functionality

Based on years of fashion experience, Infor Fashion PLM is a powerful product lifecycle management solution that offers a full suite of tools to help you achieve faster, more accurate, and more profitable product innovation. With Infor Fashion PLM you get:

Merchandise Planning module—Start from the sales budget and define your collection and line plans here. Information such as financial values and product details can be updated at any time.

Report generator—Eliminate the need for third-party reporting tools and lower your cost of ownership with a built-in report generator and standard templates. Standard reports include: Style card, style status overview, style construction, style technical drawings, style colorways, style care and content, style BOM, style, measurements, material card, material overview, trim card, color card, and request comments.

Adobe Illustrator plugin—Seamlessly exchange data between Adobe Illustrator and Infor Fashion PLM through a bi-directional plugin.

Compliance tools—Protect your brand's integrity with centralized supplier, product, and material templates, and requests. Quickly capture and upload compliance information and support compliance audits.

Critical path management—Create critical paths for seasons, collections, or groups of products with flexibility. Once you select your end dates, the system automatically calculates the start and due dates for activities within a milestone leg.

Task-driven home page—Set up predefined ways of working for each user. Home page customization includes finding your styles in a certain status, notifications, and most recent comments made.

Material and trim development—Leverage your buying power by grouping components, fabrics, and trims into libraries for reuse. Each item can be created from scratch, copied, mass-created, and mass-updated.

Request templates—Quickly create requests for product costings, sample production, lab dips, and supplier compliance information with just a few mouse clicks.

Image management—Handle images with flexibility by attaching and converting to your choice of formats, while also retaining a library of originals.

Administration tools—Control access to your database with authorizations that can be tailored according to a user's role, profile, groups, and relationship with your company.

System integration—Incorporate data created in Infor Fashion PLM into your ERP system and migrate existing data into the solution through the Connector Toolbox.

Partner Collaborator—Share tech pack information and work more closely with selected suppliers on specifications and costs through the optional Infor Fashion PLM Partner Collaborator.

An elegant solution that suits your business perfectly

Easy to learn and simple to use, Infor Fashion PLM provides a meaningful user experience that can inspire your team and enhance performance across your value chain.

Some of the benefits you can achieve:

- Increase speed to market to meet consumer demand.
- Unify all your teams.
- Plan new lines and execute styles in parallel.
- Increase the ratio of designs making it into production.
- Automate repetitive tasks and cut time spent on data admin.
- Reduce data entry errors and improve quality.
- Maintain your margins through fewer unplanned markdowns.
