

# Infor Product Academies

# Infor Product Academies are an investment in you and your success.

Infor® Product Academies offer a guided, prescriptive approach to mastering Infor enterprise solutions and a path to professional certification. Academies are role-based and intended for those who deliver consulting and implementation services to Infor customers including configuration, implementation, and integration of Infor applications. Academies are created for these specific roles: Pre-Sales Consultants, Functional Consultants, Project Managers, Practice Directors, Business Analysts, Support Analysts and System Administrators. Other partners and employees may benefit from these academies as well.

## Here's how it works:

- Academies are offered in instructor-led or self-directed format to meet the needs of consultants.
- Academies are open to Infor partners, employees and customers.
- Academies range from 6 to 8 weeks, depending on the product and track.
- Courses are based on proven implementations of Infor solutions.
- Seats in instructor-led academies are limited and available on a first-come, first-served basis.
- Course content, duration, sequence, location, and delivery methods are subject to change.
- Academies prepare new and experienced consultants for Infor professional certifications.
- Participants in instructor-led academies are responsible for their own travel arrangements, and should not book travel until confirmation of attendance is received.
- Consultants may be asked to bring a laptop to instructor-led academies. System requirements are communicated after registration.

---

## Academies are designed to deliver these benefits:

Augment onboarding activities.

Extend and deepen the knowledge of Infor enterprise technologies and applications.

Improve knowledge retention through immersive, sequential learning paths, resulting in successful implementations.

Provide the right content for the right role through Learning Tracks.

Present courses that are aligned with Infor Certification exams so consultants can prepare for certification.

Academy options to meet the needs of individuals and work schedules.

# Experience Flexible Delivery with Instructor-led or Self-directed Product Academies.

## Instructor-led Product Academies

offer a combination of face to-face and virtual instructor-led training so consultants can progress along a specific learning path toward certification. This option is recommended for new hires or consultants with 1-3 years of software implementation experience. Instructor-led academies are delivered onsite or in a virtual classroom by expert instructors who can provide individualized attention. Courses include workbooks and hands-on exercises for maximum retention.

## Self-directed Academy Prep and Certification (PaC)

is recommended for consultants with 3+ years of software implementation experience who require a flexible learning environment due to their work schedule. Academy PaCs consist of eLearning and Self-directed Learning courses organized in a recommended sequence. Each course includes a workbook, training environment for hands-on exercises, and access to an instructor.

**Academies prepare new and experienced consultants for Infor Certifications exams.**
