### Challenges

- Provide more reliable human capital data, particularly across country borders.
- Eliminate highly customized system with one that would automate and leverage talent across the businesses.
- Implement an easy-to-use employee and manager self-service system.

### Benefits

- Gained high confidence in human capital data reliability, allowing management to make better decisions.
- Automated processes and standardized policies, improving business growth opportunities.
- Significantly improved the efficiency and simplicity of HR processes, saving costs.
- Achieved a high satisfaction rate among employees: maintains a caller program with no more than a 30-second wait, and less than a 5% caller abandonment rate; continues to exceed a first-call resolution goal of 50% by delivering 60% to 70%, and to exceed a first-day resolution goal of 60% by delivering 75% or higher.
- Implemented a central, comprehensive system that includes benefits and pay information, time recording, performance management, succession management, career development, compensation planning, employee and manager self-service, and a central multi-lingual service center.
