

Punta del Agua enhances asset management with Infor EAM

About Punta del Agua

Punta del Agua S.A is a family-owned dairy company founded more than 40 years ago, specializing in cheese, butter, and milk. It manufactures quality products in competition with leading brands, and uses high technology for its management processes. The company's products are sold in its local market, and exported to more than 20 countries as well.

“We are very happy with the software selection and expect important benefits in a short time. Currently, we have automated the maintenance operations sector and the process has just begun.”

Luciano Bonetto
CFO, Punta del Agua
