“ Infor has done a great job of fitting the solution to the industry. Take advantage of that. Look at what they’ve done and figure out how to optimize your business using the tool that they offer.”

Michelle Kelley, IT Director, Ring Container

“ I would say that you should invest in department experts within your company; people that understand how you’re using the application and data, because the Infor LN application is very flexible.”

Michelle Kelley, IT Director, Ring Container

About the company

Ring Container Technologies is a leading manufacturer of plastic containers for food and other packaged products. It is a privately held, multinational corporation focused on finding sustainable solutions for the consumer packaging industry. Headquartered in Oakland, TN, the company began operations in 1968. Through steady growth, they’ve become one of the largest plastic container manufacturers in North America with the highest financial returns in the Plastic Bottle Industry. They now coordinate 18 plants operating on two continents. To learn more, visit www.ringcontainer.com.

Business case

- Coordinate 18 plants across two continents to handle increasingly complex customer requests.
- Improve overall speed to deliver integrated solutions to customers.
- Reduce cost of implementing customized software.
- Use distribution centers closer to customers to deliver accurate orders quickly.

Why Infor?

- Infor ION Business Vault’s ability to help disparate business systems share information easily improves Ring Container’s process for developing new plants.
- Infor Ming.le collaboration tools promote seamless business operations and improved communication companywide.
- Infor LN simplifies business operations, offering one solution for multiple industry needs.
- Infor’s industry-specific solutions required minimal customizations, reducing IT costs.
- Helped Ring Container handle customer requests more quickly.
