

Tecfil improves lead time and service levels with Infor LN

About the company

Founded more than 60 years ago, Tecfil® has become the largest automotive filter manufacturer in Latin America. Based in Guarulhos, a municipality within the state of São Paulo in Brazil, the company has 1,300 employees and a production capacity of 6.8 million filters per month. With quality and customer service at the center of Tecfil's business model, the company is a market leader in aftermarket automotive products, which accounts for approximately 65% of its total revenue.
