

# Infor Chemicals

## Create a better formula for manufacturing success

### Prepare for today's fast-paced business environment

From fluctuating commodity prices and growing price sensitivities, to preparing for quality and recall audits—chemical manufacturers like you can't afford to rely on an outdated, generic, or poorly integrated enterprise resource planning (ERP) system. Yet, that's exactly what's happening.

A Gatepoint research survey shows that many chemical manufacturing executives feel their ERP systems aren't powerful enough for today's business needs.<sup>1</sup>

### Is your ERP system holding you back?

The results of Gatepoint's research survey showed that the top chemical manufacturing challenges include:

### Are you getting what you want from your ERP system?

The survey results also showed that the ERP tools and features chemical executives want are:

**45%**

Stronger business intelligence

**37%**

Easier upgrades

**33%**

Industry-specific functionality

**30%**

Access on mobile devices

### Make your ERP work for you

Keeping up with customer demands, while ensuring safety and compliance with regulatory mandates, can't be accomplished if you're playing catch-up. Here's how to use these ERP tools:

#### Business intelligence

Get early warnings with pre-defined alerts on your raw materials supply and equipment needs.

#### Planning and scheduling

Find a problem, isolate it, analyze it, and identify a solution before it creates a bottleneck.

#### User experience

Make data accessible with visual interfaces, charts, graphs, and customized reports.

#### Mobile access

Keep your employees connected everywhere—whether they're in the plant or out on sales calls.

### Improve the way you work

Infor Chemicals is a comprehensive solution designed to solve your unique challenges. It offers a new, modern user interface; collaboration tools; and a beautiful user experience—without the need for customizations. Plus, Infor Chemicals gives you industry-specific analytics that provide deeper insights into all aspects of your business, so you can improve your planning and scheduling.
